

CANADIAN RECIPROCITY BILL IS PASSED BY SENATE LATE TODAY WITH SAFE MARGIN OF 53 TO 27; IS VICTORY FOR PRESIDENT TAFT

PRESIDENT'S PET PROJECT
PASSED BY SENATE WITHOUT
AMENDMENT AND ACCOM-
PLISHES PURPOSE OF
EXTRA SESSION.

LONG FIGHT IS ENDED

Three Democrats and Twenty Four Re-
publicans Vote Against the Bill
Which Must Be Engraved by
House Before Signed By
Taft.

[BY UNITED PRESS.]

Washington, D. C., July 22.—President Taft's pet project, the Canadian reciprocity agreement, passed the senate this afternoon without amendment by a vote of 53 to 27.

With the signature of the President, expected to be added next Wednesday, the agreement will become a law and the legislation for which the extra session of Congress was convened will be completed.

Three Democrats and twenty-four Republicans voted against the bill.

Those Voting Against:
The Democrats voting against it were: Bailey, Texas; Clarke, Arkansas; and Simmons, North Carolina.

The Republicans were: Borah, Idaho; Bourne, Oregon; Brewster, Kansas;

Introduced in house by Representative McCall of Massachusetts. Referred to committee on ways and means.

Feb. 11—Reported by Representative McCall.

Feb. 14—Passed house.

Feb. 15—Transmitted to senate and referred to committee on finance.

Feb. 21—Reported without recommendation by Senator Burrows.

IN FIRST SESSION 62ND CON-
GRESS.

April 12—Introduced in house by Representative Underwood, referred to committee on ways and means.

April 13—Favorably reported.

April 21—Passed house; ayes 267, nays 89.

April 24—Transmitted to senate, referred to committee on finance.

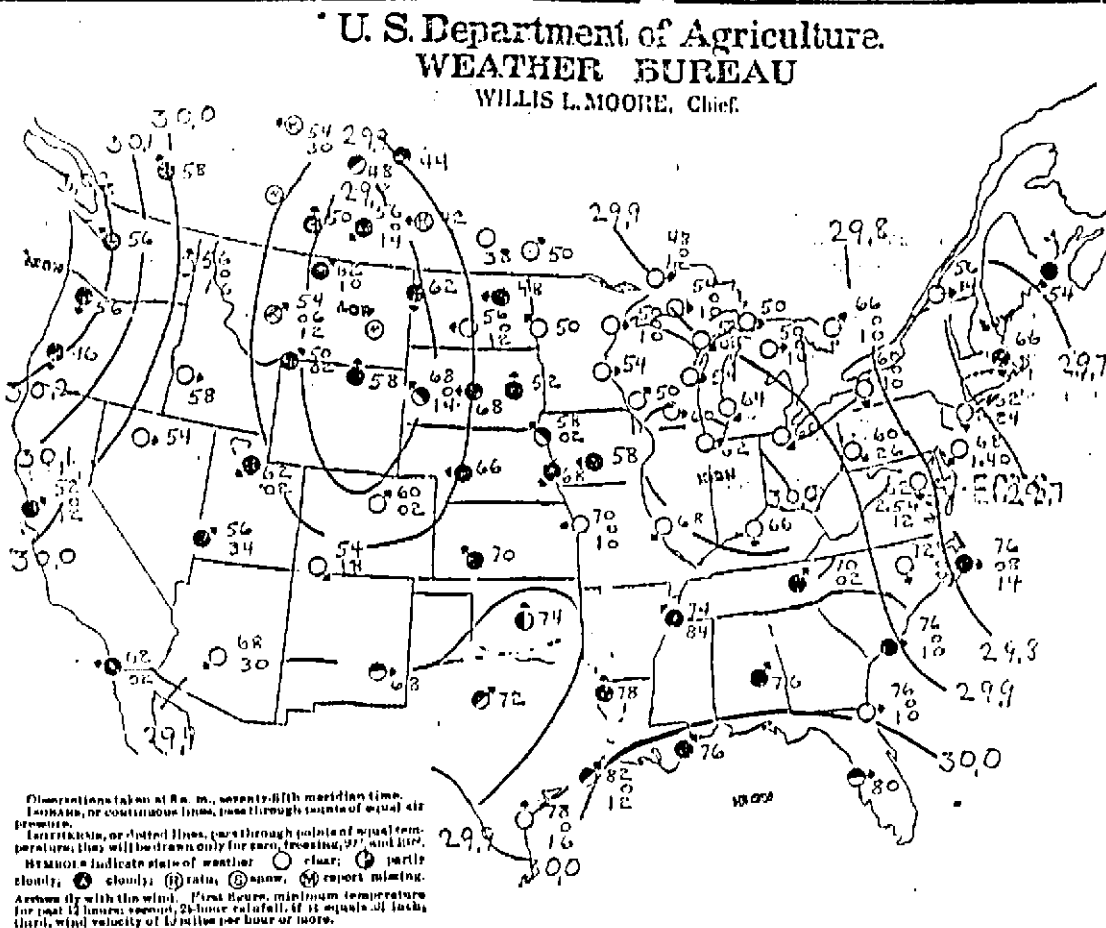

May 11 to June 5—Hearings in the senate.

June 8—Committee agreed to report without commendation with Reo amendment.

June 12—Reported to the senate by Senator Penrose; minority reports by Senator McCumber of North Dakota, and La Follette, unfavorably, and favorably by Senators Williams of Mississippi, Kern of Indiana, and Stone of Missouri.

June 14—Made unfinished business in senate. Debate begun by Senator McCumber against bill.

June 23—Agreement to vote on Reo amendment.

WEATHER CONDITIONS.

An area of low barometric pressure on the North Atlantic coast has New York to Charleston, and westward to the Appalachians. The main Atlantic coast, Atlantic City reports 1.0 inches, and Washington, D. C., 2.54 inches during the past 24 hours. Clear weather prevails in the lake region and Ohio valley. Unsettled and in the Rocky mountains, where cloudiness and scattered light rain is reported. The Northern Rockies, and will move eastward and northward. A moderate barometric depression is expected. Its influence will be felt in the vicinity Sunday afternoon or evening when the showers or thunderstorms are to be expected. It is fair on the Pacific coast, except in Oregon and Washington, where it was cloudy this morning.

CHOLERA VICTIM IS CLAIMED BY DEATH; CASE ON MANHATTAN

Italian Steamer Passengers Died on
Swinsburne Island—Spanish Fire-
man Taken Ill on Island of
Manhattan.

[BY ASSOCIATED PRESS.]

New York, July 22.—A seventeen-year-old boy, steamer passenger from Naples, died of cholera at Swinsburne Island today.

Physicians at Bellevue hospital said this afternoon that Manuel Hernandez, a Spanish fireman, who came from England July 1, was suffering from cholera. He will be removed to Swinsburne Island. This is the first cholera case to develop on the island of Manhattan.

MILLIONAIRE DULUTH MINE OWNER IS DEAD

John McCahall, Who Made Fortune In
Deal in Real Estate On Iron
Ranges Has Passed Away.

[BY ASSOCIATED PRESS.]

Duluth, July 22.—James McCahall, aged 58 years, millionaire mine owner, is dead at his home in Lake City.

In the early days McCahall, who was a carpenter, traded a piece of Duluth real estate valued at \$1,500 for 100 acres of land on Mesaba ridge. The section now is known as the Shingora iron mine, which is said to contain forty million tons of iron ore.

CARDINAL GIBBONS IS SEVENTY-SEVEN

Noted Prelate of Roman Catholic
Church Celebrated Birthday To-
day at Mansion in Baltimore.

[SPECIAL TO THE GAZETTE.]

Baltimore, Md., July 22.—Letters and telegrams of congratulation have been pouring into the mansion of Cardinal Gibbons, who, enjoying the rugged health and vigor of a man fully ten years younger than he, will celebrate the seventy-seventh anniversary of his birth tomorrow. There will be no official observance of the anniversary and Cardinal Gibbons will spend the day quietly at his residence, receiving only some of his most intimate personal friends.

BURNS PLEADS NOT GUILTY TO CHARGE

Detective Charged With Kidnapping
James McNamara Pleads Not Guilty
in Indianapolis Court.

[BY UNITED PRESS.]

Indianapolis, July 22.—Pleading not guilty to charges of kidnapping James J. McNamara, Detective Burns appeared in the Criminal Court today, waived his plea and furnished bond of \$2,500 on each of the four indictments against him.

Big Military Tournay in Chicago.

Chicago, Ill., July 22.—The great military tournament under the auspices of the Chicago Association of Commerce opened here today at Grant Park. Six thousand troops, representing the militia of Illinois and several other States, regular troops from Fort Sheridan and British troops from Canada, will take part in the tournament, which has already attracted several hundred thousands of visitors to this city.

ROOSEVELT CHARGES DUPLICITY ACTIONS IN ALASKA AFFAIR

Declares in Outlook Development of
Alaska Was Hindered by Selfish
Law Defying Capitalists and
Congress.

[BY ASSOCIATED PRESS.]

New York, July 22.—In today's issue of the Outlook, Theodore Roosevelt declares that the development of Alaska was hindered by selfish law defying capitalists and the congress who, "under pretense of hostility to corporations, oppose legislation which will authorize capitalists to develop coal fields with fair profit while doing justice to others."

Roosevelt criticizes the Interior department for disposing of twelve thousand acres at Controller Day, which he says was the best chance for a free outlet from the Bering river coal fields.

"The government should have held this land in perpetuity," says Roosevelt, "permitting its use by any individual or corporation under conditions subservient to public interests."

INJURIES IN AUTO ACCIDENT ARE FATAL

Elgin Woman Died Today From In-
juries Received When Machine
Turned Tiptoe Pining Her
Death.

[BY ASSOCIATED PRESS.]

Elgin, Ill., July 22.—Mrs. Ethel Gleason, aged 28, died today as the result of an automobile accident Thursday night. A party of four was returning from Lake Geneva, when striking a freshly graded road, the machine skidded and turning turtle pinned the occupants underneath.

MILWAUKEE CAVALRY CO. LEAVES FOR CAMP DOUGLAS

Milwaukee, July 22.—A special train today with the Milwaukee's cavalry company, 71 officers and men of troop A, W. N. G. carrying horses and full equipment for Camp Douglas. Encompanied of one week will be made.

August, Mo., July 22.—A hearing was had today in the State Supreme Court on the petition to dissolve by decree of the court the "Wellman-Chicago Record-Herald Polar Expedition," a corporation formed in this city two or three years ago to finance the polar expedition of Walter Wellman. He had hoped to reach the North Pole by means of a balloon, starting from Spitzbergen, but failed. There are no liabilities or assets.

Utah May See Bullfights.

Salt Lake, Utah, July 22.—The great Spanish Festival, which began today at Salt Lake, has attracted thousands of visitors from all parts of the West and Southwest. The principal day will be Monday, when the anniversary of the entrance of the pioneers in Salt Lake Valley will be celebrated. The most powerful magnet for attracting visitors seems to be the expectation that bull-fights will be given in the specially erected arena at Salt Lake. Some of the most famous matadors and toreros from Mexico have been brought here and also a number of bulls of the special breed employed in the Spanish and Mexican bull-fights. It is quite probable, however that the church people of this city will take prompt steps to put a stop to any bull-fights that may be attempted to be given.

Ohio's Oldest Daily Under the Hammer.

Cincinnati, O., July 22.—The effects of the Commercial-Tribune of this city, which enjoyed the distinction of being the oldest daily in the State of Ohio, were put up at public auction today by the sheriff of Hamilton County today.

HINES TESTIFIES ON ACTION IN LORIMER VOTE LAST SPRING

Admitted in One Hour Session Today
of Spending Month in Washington
"Telling Facts" to Several
All Senators.

[BY ASSOCIATED PRESS.]

Washington, D. C., July 22.—The Lorimer committee had a one-hour session and adjourned until Monday. After examining Edward Hines relative to his activities to influence the vote of the senate last spring on unseating Lorimer, Hines admitted that he spent a month in Washington last prior to the vote, mixed with several senators "to tell them the facts."

He denied he sought to influence the vote of Senator Dewey during the visit with President Brown of the New York Central railroad.

FINAL SESSION OF STATE FEDERATION

Sheboygan Chosen As Meeting Place
of State Federation of Labor in
1912.—Officers Named.

[BY UNITED PRESS.]

La Crosse, Wis., July 22.—Sheboygan was today chosen for the 1912 convention of the Wisconsin State Federation of Labor, all other contestants withdrawing. Frank J. Weber, Milwaukee, was re-elected secretary-treasurer and appointed delegate to the next meeting of the American Federation of Labor.

In a virile speech this morning, Carl Sandburg representative of the Newspaper Writer's Union and connected with the Milwaukee Social Democratic Herald attacked newspapers of this country alleging they were all controlled by the "interests" and enemies of organized labor. The meeting adjourned at noon today.

RAILROAD STOCKS MAKE GAINS TODAY

More Important Roads Show Advances
of a Quarter to a Half and Union-
Pacific Reaches High Mark.

New York, July 22.—Moderate strength was shown at the opening of the stock market today, many of the important railroads making gains ranging from a quarter to a half. Local railroads were irregular. Union-Pacific common made a new high record for the year, selling at 192 and 5/8.

Utah May See Bullfights.

Salt Lake, Utah, July 22.—The great Spanish Festival, which began today at Salt Lake, has attracted thousands of visitors from all parts of the West and Southwest. The principal day will be Monday, when the anniversary of the entrance of the pioneers in Salt Lake Valley will be celebrated. The most powerful magnet for attracting visitors seems to be the expectation that bull-fights will be given in the specially erected arena at Salt Lake. Some of the most famous matadors and toreros from Mexico have been brought here and also a number of bulls of the special breed employed in the Spanish and Mexican bull-fights. It is quite probable, however that the church people of this city will take prompt steps to put a stop to any bull-fights that may be attempted to be given.

Ohio's Oldest Daily Under the Hammer.

Cincinnati, O., July 22.—The effects of the Commercial-Tribune of this city, which enjoyed the distinction of being the oldest daily in the State of Ohio, were put up at public auction today by the sheriff of Hamilton County today.

PROHIBITION VOTE IN TEXAS TODAY IS CLOSELY CONTESTED

Early Reports Show That Balloting is
Heavy With Both Sides Con-
fident of Victory.
[BY UNITED PRESS.]

Austin, Tex., July 22.—Early reports from many large cities showed heavy balloting today on the proposed constitutional amendment for state-wide prohibition. A close outcome is expected, both "wets" and "drys" being confident.

Weather Conditions.
Dallas, Tex., July 22.—With heavy rains falling over many dry strongholds in the northern portion of the state and fair weather prevailing in the "wet" country farther south, voters in Texas today are deciding the question of statewide prohibition.

IMPORTANT CHANGES EFFECT OF NEW LAW

J. Q. Emery Is Made State Superin-
tendent and Assistant Chemist
Downing Is Superintendent of
Weights and Measures.

[BY UNITED PRESS.]

Madison, Wis., July 22.—Frederick P. Downing, assistant chemist for the state dairy and food commission has been transferred to the new position of chief superintendent of weights and measures for Wisconsin. Acting under the new law dairy and food commissioner J. Q. Emery is ex-officio state superintendent. The new law is already in force and assurance was given by Mr. Emery today it would be pushed vigorously.

New Bank Authorized.
The state bank examiner today authorized the Farmer's State Bank at Spring Green, Wis., to do business. The bank is capitalized at \$25,000.

GIDEONS HAVE AIM FOR WORLD ASSOCIATION

[BY UNITED PRESS.]

Milwaukee, Wis., July 22.—An effort will be made at the session of the Gideons here late this afternoon to form an international association which will give the Christian traveling men representation all over the world.

LAWYERS DEFENDING CAMORRISTS LEAVE BECAUSE OF INSULT

Attorneys Abandon Forty Odd Prison-
ers Which May Mean An En-
tirely New Trial.
[BY UNITED PRESS.]

Viterbo, Italy, July 22.—Lawyers defending the forty odd Camorristi, Italy's noted criminal band, on trial for four months, abandoned the prisoners today because of an alleged insult by one of them. The case may have to be entirely retried.

DIES FROM EFFECTS OF FALL FROM ROOF

Wm. Schultz of Whitewater Died
Tuesday From Effects of Fall of
Thirty Feet From Barn Roof.

[SPECIAL TO THE GAZETTE.]

Lima, July 22.—Wm. Schultz, of Whitewater, while shingling on Wm. McCord's new barn last Monday, lost his footing and fell a distance of 30 feet to the ground. His back was broken just below the shoulders and his body from that point down was paralyzed.

Mr. Schultz lived twenty hours after the accident. He leaves a wife and four children, the oldest being a girl twelve years old.

ROAD ORDERED TO INSTALL SERVICE

Soo Line Ordered to Operate Trains
On Branch Line From Spirit Falls
to Chelsea.

[BY UNITED PRESS.]

Madison, July 22.—The state railroad commission today issued an order requiring the Soo railway to operate trains on its branch line from Spirit Falls to Chelsea, Wis., and drafted a schedule of rates that may be charged by the road for transportation of freight.

JEWELS TAKEN FROM HOTEL APARTMENTS

Summer Resident at Sault Ste. Marie
Robbed of \$1200 Worth of Jewelry
While on Shopping Tour.

[BY UNITED PRESS.]

Sault Ste. Marie, Mich., July 22.—While Mrs. W. G. Wilson, wife of an officer of the Lake Superior Corporation was shopping today, thieves entered her apartments in the Algonquin hotel and robbed her of jewelry worth \$1200.

ALASKA SUFFERING FROM FOREST FIRES

Forest Fires Are Reported to be Rag-
ing Around the Town of Haynes,
Alaska, and Are Threatening
Its Safety.

[BY ASSOCIATED PRESS.]

Washington, D. C., July 22.—Forest fires have been raging in the vicinity of Haynes, Alaska, for three days and are now within half a mile of the town, according to a report received here today. No mention is made of loss of life as yet.

VILLAGE IS SAVED BY SHIFTING OF WIND

Rapids, Hamlet Near Manitowish,
Narrowly Escaped Destruction by
Fire Yesterday.

[BY UNITED PRESS.]

Manitowish, Wis., July 22.—A shift in the wind probably resulted in saving the village of Rapids, two miles west of here, from destruction by fire late yesterday. The fire started from a lighted cigar stub. The loss will be about \$5,000.

EXHAUSTED IN SWIM TO ENGLISH SHORE

Swimmer Starting From French Coast
to Swim English Channel Ex-
hausted in Twentieth
Attempt.

[BY UNITED PRESS.]

Dover, England, July 22.—Starting yesterday from Saugate, France, to swim the English Channel, Jabez Wolffe was picked up fifteen hours later, 3,000 yards from the English shore utterly exhausted. It was his twentieth attempt.

REBELS DRAW NEAR TO PORT AU PRINCE

Capitol of Haiti is Seriously Threat-
ened Today And Situation
is Critical.

[BY ASSOCIATED PRESS.]

Port Au Prince, July 22.—The revolutionists are marching on the capitol. The situation of the government is critical. President Simon is seriously ill.

PRESIDENT WM. H. TAFT, THROUGH WHOSE INSISTENT EFFORTS
THE RECIPROCITY BILL WAS PASSED.

ran: Burnham, New Hampshire; Chapp, New York; Crawford, South Dakota; Cummins, Iowa; Curtis, Kansas; Dixon, Montana; Gamble, North Dakota; Gronnah, Oregon; Idaho; Keyton, Iowa; La Follette, Wisconsin; Lippert.

Amendments Defeated.
The climax of reciprocity came today when the Underwood bill, making effective the Canadian contract was passed through its final stages in the Senate. The first McCumber amendment designed to reduce present duties on a wide variety of household articles was defeated 16 to 61.

The Nelson amendments to place duties on grains, butter, cheese, horses, cattle and sheep was rejected, 23 to 28. In rapid succession the Senate then voted down amendments by Simmons, Cummins, La Follette, McCumber and Bailey.

La Follette's wool amendment was voted down 14 to 84 on the sixth vote, although backed by 41 progressive followers throughout the voting. La Follette's amendments to the reduction of duty on cotton goods, and for free wool only and print paper after January 1912, both were defeated, the first 15 to 84, and the last 11 to 87.

Religious Workers at Lake George.
Lake George, N. Y., July 22.—Nearly five hundred religious workers, representing practically every state and territory in the United States and many parts of the Dominion of Canada, are in attendance at the conference of the Men and Religious Forward Movement which opened at 8:15 p.m. today to continue until the end of the month.

To House for Engraving.
[BY ASSOCIATED PRESS.]

The bill must be returned to the house for engraving before it can be signed by President Taft. This will not be until next Wednesday. The house having adjourned until that time. The final vote came at the close of a lively session. There were numerous roll calls on various amendments but no attempt was made to delay the final action.

Taft is Glad.
The news of the passage of the bill was telephoned to the White House. President Taft made no attempt to conceal his pleasure.

DATES IN PROGRESS OF RECIPRO- CITY BILL.

Jan. 7—Representatives of Canada arrived in Washington.

Jan. 8 to Jan. 21—Conference held.

Jan. 26—President transmitted agreement to congress.

Jan. 28—Canadian reciprocity bill

introduced in house by Representative McCall of Massachusetts. Referred to committee on ways and means.

Feb. 11—Reported by Representative McCall.

Feb. 14—Passed house.

Feb. 15—Transmitted to senate and referred to committee on finance.

Feb. 21—Reported without recommendation by Senator Burrows.

IN FIRST SESSION 62ND CON-
GRESS.

April 12—Introduced in house by Representative Underwood, referred to committee on ways and means.

April 13—Favorably reported.

April 21—Passed house; ayes 267, nays 89.

April 24—Transmitted to senate, referred to committee on finance.

May 11 to June 5—Hearings in the senate.

June 8—Committee agreed to report without commendation with Reo amendment.

June 12—Reported to the senate by Senator Penrose; minority reports by Senator McCumber of North Dakota, and La Follette, unfavorably, and favorably by Senators Williams of Mississippi, Kern of Indiana, and Stone of Missouri.

June 14—Made unfinished business in senate. Debate begun by Senator McCumber against bill.

June 23—Agreement to vote on Reo amendment.

Hall & Huebel

A Catch.
Three girls in white sat under a striped awning on a sun-drenched beach. A young man approached and said, displaying three shells in the palm of his hand: "Girls, how many shells do you see?" "Three," was the reply. "I say there are four," said the young man. He shut his hand and opened it again. "Now how many are there?" "Three," the girls repeated stoutly. "Three," "I say four," he declared. "Will you each give a dollar to the Children's Country Week if I'm wrong?" "Yes," they agreed. "Then give it," said the young man, "for wrong I am—there are only three. I've caught six persons with this dodge this week!"

Paper Bottles for Milk.

Some of the milk companies are trying out new paper bottles, stiffened and made air and milk tight with refined paraffin, white wax. Paper impregnated with paraffin looks and feels oily and greasy, but handlers of such paraffined paper need have no fear of getting grease even on the most delicate fabric. Of course, if paraffin is heated and melted cloth will take it up, and then it is difficult to get out. Nothing is cleaner or freer from germs than pure paraffin, and it may be injected right under a man's skin without causing any trouble.—New York Press.

Golf Rules Worth Heeding.

Lord Avebury, the lord rector of St. Andrew's University of London, in the course of an opening address offered the following advice: "Keep your eye on the ball. Keep straight. Keep in the course. Take time. Do not press—never up, never in. Don't lose heart. Be temperate in all things. Keep your temper, or you'll lose the game." From which it may be seen that the rules of golf make a fairly good philosophy to live by.

To Dine Once a Year with Cat.
An eccentric old lady, a spinster of Aberdeen, left a legacy of \$10,000 to a nephew, providing that he "have a cat to dinner with him every New Year's day." This had been a custom of the old lady herself for a long period, and she devoutly believed it insured her good luck. As may be supposed, the fortunate nephew most readily accepted the eccentric stipulation—and, the \$10,000.

Doesn't Work Both Ways.
Liquor improves with age, but unfortunately this same rule doesn't apply to those who drink it.

Chicago, Milwaukee & St. Paul.

CASH TRAIN FARES TO BE INCREASED BY NEW STATE LAW

After August 17, Ten Cents Extra Must be Paid When Tickets Are Not Purchased.

Local agents and conductors are in receipt of instructions just issued relative to the new law concerning railroad rates which becomes effective August 17. This law provides that when passengers board trains at stations where tickets were on sale for the train taken, the cash fare on the train between stations in Wisconsin will be ten cents more than the ticket fare for adults and ten cents more than the half ticket fare for children.

When the passenger passes through any other state enroute this law does not apply. In such a case the cash train fare would be the same as the ticket fare. As the law is merely a state statute it does not apply to trains from one state to another or interstate travelers; it applies merely to persons who go from one station to another within the bounds of this state. Its effects will be felt most on short runs like those from here to Madison, to Milwaukee or any other line on which people have been accustomed to take the train without taking the trouble of stopping to the ticket office to provide themselves with the necessary tickets.

After August 17, when the law goes into effect, if a person takes the train from here to Milton without buying a ticket it will be necessary for him to pay the regular fare and ten cents additional, making the rate more than three cents per mile.

Such an increased rate in the nature of a penalty for not purchasing a ticket will induce most of the local travelers to provide themselves with tickets. This will greatly decrease the work of conductors on the trains. The work of conductors will be affected by this new statute is clearly shown by the records of a few who run on trains to and from this city.

On the line between Janesville and North McGregor, Iowa, one conductor issued receipts for over 1,000 cash fares in five days. At the rate of 200 issued each day it is easy to see what a burden has been placed on the conductors in addition to their regular duties by this custom in the past. Another conductor between this city and Chicago issues more than 100 each day.

By eliminating this extra work, as the new law aims to do, a great burden will be taken from the shoulders of the conductors and they are unanimous in expressing satisfaction that the law will soon be in force. The temptation to pocket part of the cash fare will also be taken away from the conductor, to a large extent, and all the officials concerned seem pleased that the legislature was induced to make this law, even though it is not the kind that was sought.

This law was substituted for the one first proposed, which would increase all cash fares to three cents per mile and leave the regular ticket fare at the two cent rate. The legislators, however, saw fit to adopt and enact into law the rule which has been followed by the Chicago and Northwestern company for some time. This custom was adopted by the Northwestern company for the same purpose to be covered by the law but they found that the travelers found it just as little trouble to have the refund checks, cashed as it would be to buy a ticket and the rule did not seem to have the desired effect.

After the seventeenth of next month there will be no refund made on the receipts which conductors will give for payment of fares on the train. If people have the desire to increase the trouble of the conductors in the future by paying fares on board the trains they will be obliged to pay the penalty of ten cents and can not get a refund of that fine as was customary on the Northwestern line.

Engineer Townsend is taking the place of Steinman on the 7 o'clock switching job.

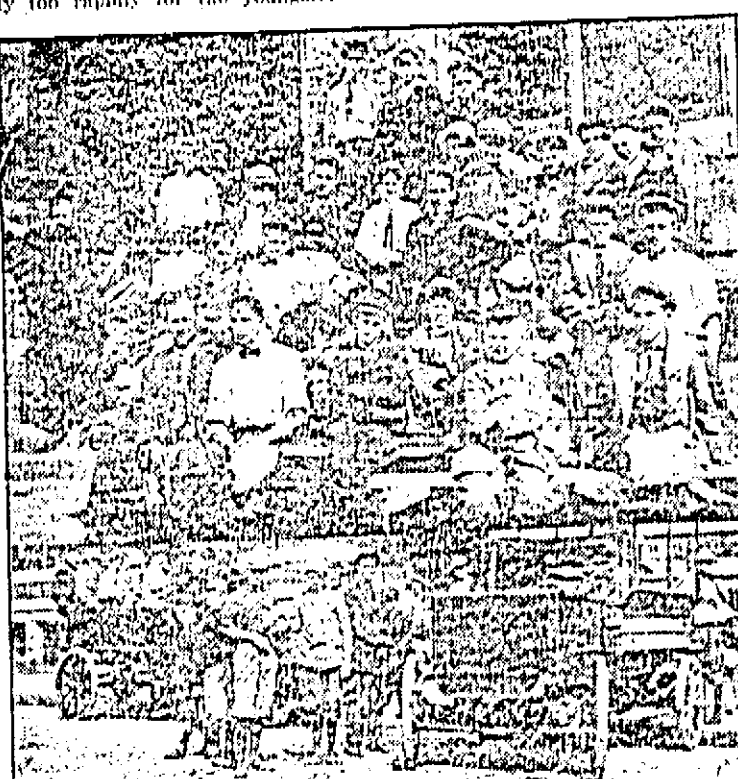

Holidayless Leisure.
There is no one so much to be pitied as the man who has nothing to do but to amuse himself from year's end to year's end. To this sort of individual a holiday, and all that delightful sensation of accomplished work and freedom for enjoyment, are entirely unknown.—The Car.

Up-to-Date Caution.
Mother Bird—"Run along and play now; but be careful you don't get run over by any of those flying machines."—Metropolitan Magazine.

JUNIORS ENJOYING BIG TIME AT LAKE

Reports From Y. M. C. A. Camp At Lake Delavan Are To the Effect That Boys Are Enjoying Life To Full Extent.

Word received from the twenty-six boys of the Junior class of the Y. M. C. A. in camp at Lake Delavan, has been brief as the boys are too busy having a good time to spend much time in writing letters. Sports of all kinds fill the days and the hours pass only too rapidly for the youngsters.

Y. M. C. A. JUNIORS LEAVING FOR CAMP AT DELAVAN LAKE.

Swimming, fishing and boating under the direction of the leaders and the camp directors, Secretary J. C. Kilian and Physical Director Sterling Campbell, and it is one grand day for the boys. Religious exercises are also included in the program of affairs at the lake, so that no side of boy life is left undeveloped. The accompanying cut shows the boys just before they started for the lake last Tuesday.

The Philosopher of Folly.
"When an old maid gets a letter," says the philosopher of folly, "she glances at it, looks around to see if her friends see her, tries to blush, and runs to her room to read it. That's to make people think it's from a man."

A Lack.
"Are the preparations all made for your husband's trial?" "Not quite," responded the prisoner's wife. "One of my dressmakers got the grip and disappointed me."

End of All Usefulness.
Helps: Despair is the paralysis of the soul.

Everything in the Store goes at a Reduction

FIRST OF ALL REMEMBER THAT THE BIG STORE IS SO MUCH BIGGER THAN ANY STORE IN SOUTHERN WISCONSIN THAT IT MEANS A SALE BIGGER THAN ANY OTHER STORE CAN POSSIBLY MAKE. TWICE EACH YEAR WE MAKE AN EXTRA CASH REDUCTION SALE. THIS SALE WILL BE AN IMPORTANT EVENT IN THE ANNALS OF DRY GOODS SELLING IN JANESVILLE. A SALE THAT IT WILL PAY EVERY PERSON TO ATTEND WHO HAS ANYTHING TO BUY IN DRY GOODS, WEARING APPAREL, CURTAINS OR FLOOR COVERING. THIS SEMI-ANNUAL REDUCTION SALE WILL BEGIN MONDAY, JULY 24TH, AND CONTINUE FOR TWO WEEKS UNTIL AUGUST 5TH.

The Village Blacksmith

This great masterpiece painted by H. de Mareau will be displayed free to the public on our second floor for TWO WEEKS, COMMENCING JULY 24th. Valued now at \$60,000.

To bring this great painting to Janesville costs The Big Store a neat sum, but it is estimated that 20,000 people will see it during the two weeks' exhibition, which cannot help but result favorably to us.

This world famous canvas is the crowning achievement of H. de Mareau, a painter of Cannes, France, who died almost a pauper in 1893. The picture was sold by his widow for \$2,500, and after winning a medal at the Grand Salon in Paris, it changed hands five times at a gradually increasing price till its present owner paid \$42,500 for it. It is a masterpiece of firelight work and subtle coloring, perfect to the smallest detail, the almost animated portrayal of the subject recalled instantly to mind the words in Longfellow's immortal poem:

"The Smith, a mighty man is he,
With large and sinewy hands;
And the muscles of his brawny arms
Are strong as iron bands."

The picture is 7x8 feet. It has traveled over 70,000 miles in the United States during its various exhibitions, and has been viewed by twelve million people.

WATCH REPAIRING

We make a specialty of repairing watches and keeping them in good condition. Let us demonstrate our methods in this line. Call on us when in need of repair work.

OLIN & OLSON, Jewelers

PIANO PRICES

When you buy a piano at our salesroom you get what you pay for.

We cannot give you for \$300 an instrument worth \$600, nor do we pretend to do so. All we can do is to give you full value for the money you invest. No one else can do more.

Some of our pianos are priced higher than others, because it costs more to make them—they are better instruments and worth more money.

We do not attempt to enter into price competition with cheap pianos represented as having extraordinary merit. We could offer instruments of inferior grades, make exaggerated claims for them and sell them at apparently bargain prices.

But we would rather be fair with our patrons and have a business founded on the confidence of the public—and the only way we have discovered is to give every purchaser a full equivalent for his money and without recourse to fictitious statements.

You can find pianos here higher in price than you see at most piano stores. You can also find instruments marked at very moderate prices. You can make your choice knowing that in any case you are paying no premiums over the real value of the one you select.

We handle no stenciled pianos.

THREE GUNNERS IN TIE FOR HIGH GUN

Dr. Gibson J. McVicar and William Fry Split Honors At Weekly Shoot Yesterday, Each Scoring 43.

Three gunners of the Janesville Gun club tied for the honors yesterday afternoon at the Fall Grounds at the weekly shoot of the club. Dr. J. W. Gibson, J. McVicar and William Fry each breaking forty-three targets. There was close competition among the top shooters, all making good records. The scores of the shoot:

Dr. Gibson	43
J. McVicar	43
W. Fry	43
W. E. Lawler	42
H. McManis	42
L. Nickerson	41
L. Gower	38
H. Casey	33
Tucker	30

TWO GAMES PLAYED IN LEAGUE TODAY

Hansons and Plumbers Come To Blows In First Game, While Gazette's and Calorics Play the Second.

There are only two games in the Commercial League today, one between the Gazette's and the Calorics, and the other between the Plumbers and the Hansons. In the first game, called at one-thirty at the Athletic Grounds the Plumbers and the Hansons will go to it, and some lively playing is looked for. In the final of the afternoon, the Gazette's and the Calorics will get at each other, and as the teams have been changed and strengthened some good work is looked for. The Calorics have hooked a new pitcher and are expecting to turn things up, but they will not doubt be made to hustle by the rest of the team. All games will go the regular number of innings.

The line-ups are:

Hansons—Miller, c; Howard, p; A. Kresslin, 1b; Schuler, 2b; Hansen, ss; Kelly, 3b; Enright, cf; Fasel, rf; P. Kresslin, lf.

Plumbers—Piro, c; Palmer, p; Denz, 1b; Haley, 2b; Mathews, ss; O'Grady, 3b; Blighum, cf; Mape, rf; Miska, lf.

Calorics—Loaver, c; Slater, p; Rauch, 1b; Padewell, 2b; Brummund, ss; Wallisch, 3b; Kresslin, cf; Neumiller, rf; Eckert, lf.

Gazettes—Ward, c; O. Schmidt, p; Stewart, 1b; W. Helke, 2b; McGinley, ss; P. Schmidt, 3b; Hyde, cf; G. Helke, rf; Smith, lf.

WHITE SOX HAVE CHANGED THEIR NAME TO "PIRATES"

Local Amateur Team Will Play First Game Under New Name With Whirlwinds Tomorrow Afternoon.

As four teams in the city go by the name of "White Sox," the Janesville White Sox have decided on a change in the title of their nine and hereafter will be known as the Janesville "Pirates." This change was announced by the management of the team today. On Sunday afternoon the Pirates will hook up with the Janesville "Whirlwinds," the game being called at two o'clock at Athletic park. There is much rivalry between the two teams, the Whirlwinds claiming a victory over the Pirates, while the latter aver that they have not been defeated this season. Further than that the Pirates through their manager, Paul Manthel,

have issued a challenge to any team in the city. Arrangements can be made with Manager Manthel or Captain James Cantwell.

The line-ups tomorrow will be:

Pirates: Cantwell or Dugas, p; F. Hall, c; J. King, ss; E. Muenchow, 1b; Carroll, 2b; Volkman, 3b; C. Otto, rf; Manthel, cf; Geeser or Barry, lf; Brown and Zimmerman, subs.

Whirlwinds: French, c; O'Hara, p; Villa, ss; Hemming, 1b; Blunk, 2b; Cunningham, 3b; Schuler, rf; Stewart, cf; Schuler, lf.

JANESVILLE CUBS PLAY AT DELAVAN, TOMORROW

Local Baseball Nine Will Play Second Contest This Season With Lake City Nine.

For the second time this season the Janesville Cubs, amateur champions of this city, will play the Delavan city team at Delavan. The Cubs lost to the Lake City team in the previous contest by the score of 7 to 9, but hope tomorrow to reverse the count. Delavan, however, has a strong lineup and the task will be no easy one for the Cubs. Delavan last Sunday defeat-

GEORGE HACKENSCHMIDT FRANK A. GOTCH PREPARING FOR CHAMPIONSHIP WRESTLING MATCH.

Chicago, Ill.—All interest in wrestling centers in the coming Gotch-Hackenschmidt meet to be held here Labor Day.

Promoters of the match are making preparations for a record breaking crowd and already reservations are being made for ringside seats.

Word comes from Humboldt, Iowa, that Champion Frank Gotch has started active gymnastic mat work for the match and has a new mat partner.

Yoncosof Hussano, a giant Turk, Gotch thinks that Hussano is the best man for rough work available.

A cable dispatch from London states that Hackenschmidt has finished the work of equipping his gymnasium at Shoreham and will start hard work training for his match with Gotch as soon as the weather becomes cooler.

It is understood that Jack Canby, manager for Hackenschmidt, is on his way to Chicago to sign the final papers for the Empire A. C. venture,

ed Elthorn, 16 to 8. Jack Hall of this city will catch for them and O'Neil will pitch. The Cubs' lineup: Silverthorn, c; Berker, p; Murphy, ss; Hemming, 1b; Porter, 2b; Abraham, 3b; Elder, lf; Green, cf; Schwerin, rf.

BRODHEAD.

Brodhead, July 22.—Mrs. L. P. Treadwell of Antigo, who was a guest at the home of Mr. and Mrs. L. W. Terry, left for her home on Friday.

John Mooney spent Friday in Oshkosh.

Mrs. John Menor was a passenger to Monroe Friday for a short stay.

Miss Phyllis Provost of Oshkosh, who has been visiting her grandparents, Dr. and Mrs. A. Sutherland, left for her home on Friday.

Mr. Burke went Friday to visit with Orfordville friends.

H. N. B. Candiano of Monroe spent Friday in Brodhead.

Miss Zella Gurnall of Orfordville, has been the guest of Brodhead friends and returned home on Friday.

Miss Myrtle Newcomer and Miss

Thompson were Janesville visitors Friday.

Mrs. Bigelow, who has been here from Sun Prairie, visiting Brodhead relatives, left on Friday to spend a short time with a daughter at Ringwood.

Leighton Foster was home over night from Janesville Thursday, returning Friday morning.

Clifford Swan, who has been spending some time in Brodhead and at Deatur Park, left for his home in Chicago Friday.

Mrs. R. H. Gifford and daughters, Alice and Florence of Monroe, are guests of Mr. and Mrs. J. L. Roderick.

Miss Clara Holcomb went to Albany Friday evening to spend a few days with friends.

Mrs. John Adams returned Friday evening from her visit in the east.

Mr. and Mrs. W. G. Roderick of Monroe were guests of their son Harry, and wife, on Friday.

Miss Maud Merrill has accepted a position as bookkeeper in the cold storage plant of Jacob Marty and company.

How It Struck Dobbie.

Dobbie waited in the barber's shop while his father was getting shaved. On reaching home he exclaimed: "Oh, mamma, the man spend a lot of charlotte tooth on papa's face and then scraped it all off again with a knife."

By infallible rule it has been shown that what benefits your town not only benefits you but concerns you personally.

It Is Not to Soon to Select the School in Which to Secure Your Business Training

Each swiftly passing year of the twentieth century adds to the VALUE and the NECESSITY of a PRACTICAL EDUCATION. So many new inventions and discoveries, so many new realms of land and air being opened up, so many opportunities in business and the professions, so many ways in which life can be made effective. The young man and young woman should have the education that will best nourish, develop and adapt the powers of body, mind and soul for the best use of life.

Where Are You Going to Get This Education?

It is not always easy for an inexperienced person to make the distinction between a good school and an unreliable one, but it is the duty of ALL young persons to employ such means as are feasible to ascertain the character of the institution seeking their patronage.

The Janesville and Beloit Business Colleges

Now under one management have for years been leaders in every advanced movement for higher and more practical education.

We were the first to introduce the famous Spencerian Chartier Shorthand the greatest improvement made in stenography in 50 years. Today we have the exclusive right to teach this system in this section of the country.

The Janesville and Beloit Business Colleges were the first schools to offer special courses on the modern Adding Machine, Writerpress, and other modern office devices.

The Janesville and Beloit Business Colleges are the only schools in Southern Wisconsin affiliated with the Wisconsin Commercial Educators' Association an association standing for the highest standards of business education.

The Janesville and Beloit Business Colleges are the only schools in this part of the country which refuse to employ solicitors of any kind or ask prospective students to sign a scholarship or contract of any kind either before or after entering.

The Janesville and Beloit Business Colleges have the signed endorsement of the business and professional men of this community.

The Janesville and Beloit Business Colleges are under the management of men who have made a success in the business college field.

The Janesville and Beloit Business Colleges are the only schools that absolutely ASSURE A POSITION TO EVERY GRADUATE OR REFUND TUITION. This shows the great demand we have for high-grade office help.

Our Students

Our students are young men and women from the best homes of this city and community as well as from several other states and Canada. We seek only young people of purpose, who have a desire to "get on" in the world. We take a special interest in the advancement of every student.

We Employ No Solicitors

We appeal to the intelligence and judgment of the young men and women, fathers and mothers who read our advertisements and notice the claims we make. No High-Grade educational institution has to employ solicitors to get patronage. We prefer to have young people come to us by their own choice. Our representative will only call by request.

Our Wonderful Growth

Opening our one school in Janesville 7½ years ago with only 17 students, we have pushed steadily forward until this past year we enrolled almost 400

students in our two schools. There is a reason. During this time we have turned out hundreds of graduates, everyone of whom secured profitable employment from the beginning. GRADUATING FROM EITHER OF OUR SCHOOLS MEANS A GOOD POSITION.

Unless our instructors were and are the best—unless our courses were and are the best—unless the details of our training for successful Stenographic and Business careers were and ARE the best, we could not—would not have grown to our present size.

Can't you see that it MUST mean a greater, more prosperous future to Y.O.U if you do attend the greatest, most prosperous colleges?

Or at least, doesn't it tell you that our colleges are worth your investigation—that what you should do is to pay our college a visit—or write to our scores of references—to any one of our successful graduates and find out just how and why our Colleges would unquestionably be the best colleges for you to attend?

Fall Term Opens Sept. 5

OUR SATURDAY NIGHT.

The imitator, says Orison Swett Marden in "Success Magazine," ruins his capacity for originality; for initiative; he loses his creative power; his ingenuity and resourcefulness are never developed. In fact, his executive ability—the ability to originate, to do things—is seriously crippled, if not utterly destroyed by his efforts to imitate some one else.

No human being ever yet made a success trying to be somebody else, no matter how great or successful that person might be. Success can not be successfully copied; it is original; it is self-expression. A man is a failure just in proportion as he gets away from himself.

When Henry Ward Beecher and Phillips Brooks were at the height of their fame, hundreds of young clergymen tried to copy their style, their mannerisms, their mode of expression, gestures, habits, but they fell as far short of the power of either of these giants as the common chrome falls short of the masterpiece. Not one of these imitators ever amounted to anything until he stopped copying, imitating, and began to build on his own foundations.

A great many clergymen today merely echo other preachers' sermons which they have read and absorbed. The majority of the books published are imitations of previous books, echoes of the authors whose style and plots the writers have copied. But these copied sermons and books lack vitality, force, naturalness. They do not stir the blood or touch the heart of the hearer or reader. They are cold, lifeless.

The man who walks the crowded streets of a strange city, looks in vain for a familiar face, and soon discovers that next to the wide expanse of uninhabited prairie, no place is so lonely as the busy thoroughfare with no friend or chance acquaintance in sight.

The face and figure are not the only distinguishing features, for an all-wise Creator never intended that the human family should be automata, and so every representative is endowed with a personality, and the use or neglect of this choice faculty determines destiny, in large degree.

Stuck of the work of life is necessarily initiative. A neighborhood of farmers use the same kind of machinery in planting the crop. There is no perceptible difference in the quality of the soil, or in the hours devoted to cultivation, yet the har-

vest, which is the test of successful farming, reveals the fact that a percentage of these men were simply imitators.

It is no trouble to pick out this class of agriculturalists, in a day's drive through the country. The farm houses and outbuildings have not been painted for a decade, the fences are in a dilapidated condition, and the farm machinery, unsheltered, is rapidly going to decay. The occupant is simply an imitation farmer, and the harvest, however favorable the season, is never a success.

The busy shops of industry, where hundreds of men toil, side by side, year after year, performing the same kind of work, is another realm where imitation is the rule, to large extent, and yet, from these shops and busy factories come the men who go to the front and win the prizes.

Study them carefully and you find that they have invested with the work of hand and brain the strong personality known as "heart in the work," and that means success in any calling. The notion was common, half a century ago, that young men who entered the ministry were impelled by an irresistible force, known as "a call to preach," and the zeal displayed by many old time preachers indicated that the belief in the "call" was honest.

It is often said of teachers, as well as preachers, "That girl has sure found her calling," and it is not difficult to understand why the services of such teachers is always in demand. What is true of the preacher and teacher, is true to greater or less extent in every department of toil where the heart and brain contribute to the work of the hand.

The question which confronts every young man of thoughtful mind, when he stands at the threshold of life's possibilities, is the question of an occupation, and when the fact is considered that the average boy accepts the first thing offered, failures are not difficult to account for.

There are two channels which invite young people to enter and work out a destiny. One of them is always crowded, because the work demanded is largely mechanical, and any good imitator can fill the bill.

The other never has a waiting list, because the work is creative, and the young men and women who aspire to this class of work, are willing to invest every faculty they possess and wait patiently for results.

The creators of business are the men and women who secure it; the people who attend to the details are more or less mechanical in their work and when they drop out the vacancy is quickly filled.

Products of the mill and factory never move themselves, however desirable they may be, and so the sales department is soon recognized as of the greatest importance.

The men and women in this department are in the line of promotion, because they are creators of a market for merchandise, whether their work is done through personal solicitation or by judicious advertising.

The clerk behind the counter may be an automaton at from five to ten dollars a week, and grow gray in the service with no advance in salary, or he may go to the front and be in business for himself before reaching middle life, by investing his work with all that he possesses.

The capital, always lacking in this world, is not money, but ability. Any young man who combines with honesty the ability to make money with money, never lacks capital.

Safety vaults are full of idle money because the man who possesses it usually by inheritance, lack the ability to invest it. These men are not creators, and money in itself is inanimate and of no more practical value than pig iron.

The man with idle money is always looking for the man with active brain. This is the sort of money that builds railroads and develops great industries, by joining forces with men of capital who possess both brains and money.

The men who build the railroads across the continent are creators of highways soon to become great thoroughfares, and the pioneers, who settle along the right of way, prepare in land and hardship, while redeeming the land, are creators of a new country, which in due time will bud and blossom like a garden.

It is better to be a creator than an imitator. Better to work in any field, however obscure, which taxes and interests every faculty of the mind and heart, than to lose identity in the great throng where personality is sacrificed.

PRESS COMMENT.

Needed To Retract.

Evening Wisconsin: The assertion is made that any youth who enters the University of Wisconsin with athletic inclinations may secure by proficiency in sports one-third of the number of credits required for a bachelor's degree. The University authorities have issued a statement correcting the notion that professors of physical training "are the course, it is physical training." The course, it is stated, "will involve four years of regular college work, with certain additional courses devoted to study of methods of physical training." The disclaimer is not very clear, but evidently it is intended as a disclaimer.

The impression would be harmful to any university that it would give a boy a sheepskin merely for proficiency in football or rowing. It might be especially harmful to a university supported by the state.

Colored Perhaps.

Oshkosh Northwestern: A former Oshkosh girl has broken into the limelight at Chicago by explaining to one of the big daily papers there how

a girl can work for a living and still be honest. Among other things, however, she goes on to advise young women away from home not to make girl friends, "for they never prove true when it comes to the pinch," but to make a "pal" of "some good big hearted man." And now some will be inclined to wonder if in this particular instance the "pal" is not the reporter who wrote the story for the paper.

More Excuses.

Waukesha Freeman: Thus far all the arguments presented by the state newspapers as far as observed against the income tax measure seem mainly designed to encourage the tax dodger to keep on dodging. These opponents have never a word to say in praise of the person who is manly enough to pay an honest tax. Excuses for tax dodgers are their stock in trade.

More Dissatisfaction.

Jefferson County Democrat: The desire to put hundreds of new laws upon the statute books, has long been the legislative session just ended beyond reason. Our citizens would rather have had a shorter session with comparatively smaller appropriations and relatively lower taxes. It is also true that many of the measures passed will probably never be enforced. Fewer new laws and a stricter enforcement of those already upon the statute books, would prove a welcome "reform."

Hard To Fill.

Chicago Tribune: During the prosecution of Lee O'Sell Brown an interesting debate took place as to whether bribery is a crime in Illinois. That there could be doubt on such a question was humiliating to every good citizen of the state. There has been a silly giving of testimony before the United States senate subcommittee investigating the Lorimer election that will move all men to wonder whether bribery is a crime in the United States.

It's Our Turn.

Rockford Republic: Europe likes to laugh at America when some particularly crude occurrence betrays our weakness, and we may be pardoned a stray sneaker over the meanness exhibited in all the principal nations of the continent by jealousy over spheres of influence in Morocco.

Heart to Heart Talks.

By EDWIN A. NYE.

SLEEP.

Young man—Be careful how you waste your hours of sleep, because—

You weaken your powers and lessen your chances of success in life by trying to cheat N: ure of her due.

"Pshaw!" say you. "It doesn't hurt me. I can stay up all night." But it does hurt you.

If you have a certain sum of money in the bank and you keep spending it and put less in than you take out it is a question of time when your account will be "in red."

Just so with your vitality. You have so much in stock. If you carefully use it, depositing to your credit by Nature's method, you will live long in the land. If you spend it in prodigality you hamper your usefulness and shorten your life.

Sleep—

Sleep that knits up the ravels of life.

The death of each day's life, after labor's bath,

Halm of hurt minds, great Nature's second course,

Chief nourisher of life's feast—

What Macbeth said of it is every whit literally true.

You can go without food a long time, but not without sleep. Nowadays the "fast cure" is popular. Men and women easily go without food for thirty days and more.

How long can you go without sleep? Not thirty days, nor fifteen days, nor eight days.

Moreover, the medical books tell us the food we eat is transformed into tissue while we sleep. That is the way Nature makes sleep "the chief nourisher of life's feast," changing the food into flesh and blood and nerve and muscle.

When you lose sleep there is "mal-assimilation"—the food is not changed.

"How about Napoleon?"

You have seen statements that he slept but four hours out of twenty-four? Perhaps. But it is true that he was punished. Deprived of necessary sleep, in some of his battles—Austerlitz was one—he dozed during the fighting.

One of the weak, indecisive figures of history is this same Napoleon, seen in sheer panic from Moscow or feeling feebly for his stirrups on the evening of Waterloo.

Nature will have her due even from the Napoleons and the Alexanders.

Get plenty of sleep.

If you must lose some, make it up. Fortify yourself for the future days of strain that must come to you. Lay up by store a stock of manly vigor.

UNCLE WALT

THE POET PHILOSOPHER

(Copyright, 1909, by George Matthew Adams.)

By WALT MASON.

When the earth's baked dry 'neath a barren sky, and the hot winds scorch the plain, then the farmer stands and he wrings his hands and wails for a soaking rain. "If the rain would leak," you can hear him shriek, "and moisten my wheat and oats, that Jupiter chap, when he wants a snap, could count on the rural votes." And he yells and slurs when the south wind brings the rain to his parching crop, but if too much pours you can hear his roars: "I wish that this rain would stop!"

Oh, I too and scratch in my garden patch, o'er a handful of peas and beans; and I often sigh that the whole blamed sky should be run to make my greens. The whole bunch of gods should protect my pods and nourish my pumpkin trees, and the stars should move the proper groove to favor my crop of peas. It's little I care how the others fare as the days of summer pass; let the clouds shed juice and the sun produce its heat for my garden sash!

Persistence.

Council Bluffs Nonpareil: Governor Ross of Massachusetts has consistently proved that he is not in favor of letting well enough alone. He has sent seventy special messages to the legislature and this session isn't through yet.

SHERIFF STOPS "JUDGE" LYNCH.

Rescues Alleged Child Assailant From Hands of Infuriated Mob.

Kenosha, Wis., July 22.—The village of Somers, in this county, was nearly the scene of a lynching when a posse of thirty farmers captured Frank Mann of Chicago, charged with having attacked Dorris Dixon, five years old. Ten hours before the little girl was found unconscious in a field on the Dixon farm, where she had gone to take a jug of water to Mann, who was employed as a farm hand.

The crowd had stopped at a saloon in the village when Mann, exhausted from running through the fields, came in the back door, seeking shelter. Dixon, the father of the girl, leaped on the man and beat him nearly unconscious. Efforts were made to find a rope to hang the man. Sheriff Stahl got the crowd quieted long enough to get Mann into an automobile and bring him to Kenosha.

Mann made a partial confession. He was held without bail. The girl is in a critical condition.

GETS 3,000 BEGGING LETTERS.

Mrs. Harriman Is Asked For \$110,000, 000 Alms in Year.

New York, July 22.—During the past year Mrs. E. H. Harriman, widow and sole heir to the millions left by the great financier, has received more than 5,000 begging letters. The aggregate amount of money asked for reaches the gigantic total of \$110,000,000. The amounts requested ranged from sums as small as \$10 to amounts sufficient to found a college or buy a cattle ranch.

So interested did Mrs. Harriman become in this enormous correspondence that she left instructions to have all begging letters turned over to her personally, so that she might get at the "psychology" of it all. Her idea was to find out the percentage of really worthy requests.

The task has become so enormous, however, that Mrs. Harriman has been obliged to turn the letters over to the bureau for municipal research, asking it to aid her in the study of the problem.

FAKE MEDICAL ADVISERS GUILTY.

Three Are Convicted in New York for Using Mails to Defraud.

New York, July 22.—The government's recent crusade here against "fake" medical institutes bore fruit when the United States circuit court convicted three men of using the mails to defraud. Samuel E. Hyndman, William H. Rudolph and Julius Jelski, promoters of the Collins New York Medical Institute, were found guilty of giving illegitimate medical advice and supplying useless nostrums to ignorant and sick foreigners in various states.

ANOTHER DUEL BY BERNSTEIN.

Playwright and Editor Opponent Both Wounded in "Honor" Fight.

Paris, July 22.—The playwright, Henri Bernstein, added another duel to his list when he fought Leon Daudet, editor of L'Action Francaise, first with pistols and then with swords.

Both men were wounded in the bout with swords but not seriously.

M. Bernstein took exception to articles which appeared in M. Daudet's paper and challenged the editor.

VICTORY FOR SENATOR CUMMINGS

Report on Monetary Reform Will Be Ready in December.

Washington, July 22.—Senator Cummings of Iowa has won his fight to compel the national monetary commission to submit its report to congress and to require the dissolution of the commission immediately thereafter.

In response to the agitation against the commission which has been brewing in congress, former Senator Aldrich, chairman of the body, sent word to the regular Republican leaders in the senate that he would be ready to present his report when congress convenes next December.

Chairman Penrose of the finance committee reported the Cummings bill to the senate with a favorable recommendation, but on account of the absence of Senator Bailey consideration of the bill was postponed. Its passage is assured.

"AFFINITY" EARL AGAIN WEDS.

Artist Joins Ranks of the Benedicts for Third Time.

New York, July 22.—Ferdinand Minney Earl, the original "affinity" man, has joined the ranks of the benedicts for the third time. Mrs. Earl No. 3 is described by the artist in letters from Cologne, Germany, to friends in New York as a charming young English woman, just twenty-one. Her father is an architect at Worthingham, Berkshire. According to Earl's letters his latest romance was, like the preceding one, a case of "love at first sight." The wedding took place in June.

Read the Gazette Want Ads.

Criminal, Not Commercial.

Judge A. A. Adams of the Indiana Appellate court, says the Indianapolis Star, tells a story of a man who was a good horse trader, but, through lack of a mathematical education, was unable to determine his per cent. of profits. "This man," relates Judge Adams, "made a good trade, and he was anxious to know his real per cent. of profit, so he consulted a school teacher. 'I bought a horse the other day for \$25 and sold it for \$175; now, what was my per cent. of profit?' he asked the teacher. 'That,' replied the teacher, 'was not profit; it was larceny.'"

MANY PEERS WILL BE CREATED.

King Intends to Swell List to Meet Veto Bill Crisis.

London, July 22.—King George proposed Premier Asquith he would appoint as many new peers as might be necessary to pass the veto bill. This was announced by the premier in a letter addressed to A. J. Balfour.

Unless Premier Asquith is assured the government measure will be passed it will not be placed before the house of lords until enough radicals have been raised to the peerage to insure its acceptance.

Minor concessions to the lords may be made.

From "Telephony," The American Telephone Journal, July 8, 1911.

Bell, Having Killed Competition in Racine, Replaces Modern Party Line With Anti-quoted Device

The Wisconsin (Bell) Telephone Co. is installing in Racine the code system of party lines which requires the ringing of every bell on the line whenever any subscriber is called. This action of supplanting the selective ringing with code ringing, particularly in a city the size of Racine, is meeting with violent opposition.

The News devotes nearly a column to a discussion of the scheme, and is bitter in its comments. It says, in part:

Such a system as the Wisconsin Telephone Co. is now installing is in use on the rural telephone lines. It has been declared a nuisance wherever tried in cities and will be a most rank nuisance to the telephone users in Racine. The quicker it is dispensed with the better it will be for all. The Wisconsin Telephone Co., when it absorbed the Citizens' Telephone Co., announced that it would give to all patrons in the city the best and most modern system of telephone service. When this is to be done, if ever, can only be told by the officers of the company. The start has not been as expected and no one knows what the finish will be.

So, you user of a telephone, if you are on a party line and are awakened at 2 or 3 o'clock in the morning by the ringing of the telephone bell, do not leap from your bed to answer the call unless you are certain that you are wanted. Just remain in bed and await and see whether one, two, three or four rings are given and then you will know whether you are wanted. The loss of sleep to you is but a minor matter to the Wisconsin Telephone Co.

Particular attention should be given the statement "the Wisconsin Telephone Co., when it absorbed the Citizens Telephone Co. of Racine, announced that it would give * * * the most modern system of telephone service."

Racine, it will be recalled, was one of the points at which competition was wiped out by the Bell company. The outcome is precisely what was expected by those familiar with results in other towns in which competition has been abolished. It is believed that the matter will be brought to the attention of the Railroad Commission.

Buy it in Janesville and get twice the service for the same money.

There Is Nothing Like a Monopoly To "Soak" It to the Public.

QUIZZED SENATOR OF PENNSYLVANIA

PENNSYLVANIA SENATOR CORROBORATES TESTIMONY GIVEN BY EDWARD HINES.

HE ALSO DEFENDS LORIMER

Admits Part He Took in Election—Believes Chicago Lumberman Was Active Only for Good of the Republican Party.

Washington, July 22.—Senator Hines, Republican leader of the United States senate, corroborated before the Lorimer committee of that body the evidence given by Edward Hines, so far as he had been named in the testimony of the Chicago lumberman. The senator told without hesitation the story of his participation in the election of Senator Lorimer of Illinois; of his conferences with Mr. Hines, of his urging the latter to aid in seeing that a Republican was elected by the deadlocked legislature and of his final desire that Congressman Lorimer, whom he found to be the only man upon whom the warring Republican factions of Illinois could unite, should be given the senatorship.

Senator Penrose had been usually mentioned by Hines in his testimony regarding the interest shown by the administration in Lorimer's election. Penrose voted for Lorimer at the conclusion of the first investigation into the election of senator from Illinois. In his testimony Senator Penrose said that Hines' testimony about his interest in the election was substantially correct. He went further and said that he believed Hines was working only for the good of the Republican party.

Interests Strong in Pennsylvania. Incidentally, he said that the lumber interests are very strong back in the state which he represents in the senate.

Penrose told of Hines' great interest in the preparation of a lumber schedule in the tariff bill of 1909. He told of their first meeting, when Hines interviewed him about the schedule. They naturally fell to talking about the deadlock in Illinois.

"I probably urged Mr. Hines, as a citizen of Chicago, to use his best efforts to bring about a result. I was in favor of Mr. Lorimer's election. Mr. Hines reported to me continually as I met him in the tariff discussions. I rather think I invited his activities in the matter.

"I don't recall any one asking me to send a message to Illinois. It might have been, and I might have done it," admitted Penrose.

Wishes Makes Admissions.

The testimony of C. F. Wiehe, brother-in-law of Hines, was concluded. Cross-examination brought out that when he testified before the Hines committee he could not recall many things to which he has testified here, but he remembered them "when we all got together and talked it over."

"I have heard Hines say he thought he had assisted in electing Lorimer," said Wiehe when pressed.

The committee produced a letter written April 10 of this year by William Burgess of Duluth to H. H. Kohlman, editor of the Chicago Record-Herald, in which Burgess said he had

heard a story that President Taft had wired to Hines "to get the matter hushed up." It is said that the president will soon send a written statement to the committee telling of his interest in Lorimer's election. Secretary MacVough, who has been mentioned, is also to be heard from.

\$1,000 for Campaign Fund.

It was brought out that counsel for Hines wanted to show that Cyrus H. McCormick of Chicago had contributed to the Republican campaign fund in 1908, although he testified that he was a Democrat. It was announced that a message had been sent to the secretary of state of New York asking a price on a copy of the list of contributors to the campaign, and the following answer had been received:

"Will deliver you Sheldon's original statement filed in this office November 20, 1908, for \$1,000."

"JAMES J. NEVILLE," "Secretary of State's Office."

The Sheldon referred to is George R. Sheldon, who was treasurer of the Republican national committee.

STEALS PAPER; GET 7 YEARS.

Washington Judge Inflicts Severe Penalty on 14-Year-Old Boy.

Washington, July 22.—The judge of the Washington juvenile court has just imposed the heaviest sentence ever recorded for the somewhat common practice of newspaper thievery. For stealing four copies of a newspaper out of a doorway Harrison Ward, fourteen years old, was sent to the reform school for seven years by Judge de Lacy. The lad was paroled some time ago by the same judge after being convicted of stealing coal.

KALAMAZOO TRACK VERY SLOW.

Zombrower Announces \$5,000 Purse in 2:10 Pace With Ease.

Kalamazoo, Mich., July 22.—The 2:10 pace and the \$5,000 purse, that went with it was easily won by Zombrower. Zombrower was played heavily as the favorite. He took the race in straight heats, but no exceptional time was made, as the track was exceedingly slow. However, in the last heat he did travel a mile in 2:06½.

The summary: 2:11 class, trotting; purse, \$1,000—Don Labor, won; M. Stanley, second; Deansmore, third. Best time, 2:09½. 2:10 class, pacing; stake, \$5,000—Zombrower, won; Sir R., second; Vernon McKinney, third. Best time, 2:06½.

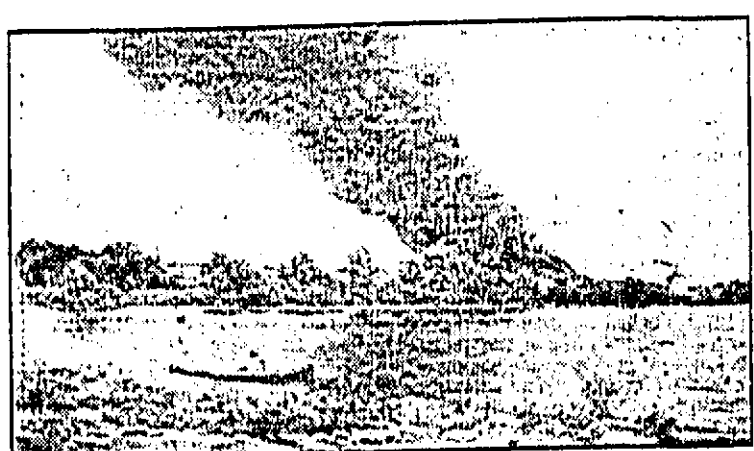

2:05 class, pacing; purse, \$1,000—Major Brine, won; Walter W., second; Black Lock, third. Best time, 2:00½.

E. G. LEWIS WITHOUT CAR FARE.

St. Louisan Tells Congressmen of Losing \$3,000,000 Fortune.

Washington, July 22.—E. G. Lewis, president of the Lewis Publishing company of St. Louis, testified before the house committee on expenditures in the postoffice department that whereas a few years ago he was worth between \$2,000,000 and \$3,000,000, he was compelled to borrow the money to come to Washington to appear as a witness before the committee.

Mr. Lewis told of what he called his persecution by postoffice inspectors who had come into his plant, "their attitude being," he said, "that we were under some criminal charge." This was at the time of an investigation several years ago as to whether the company was entitled to second-class mailing privileges.

VIEW OF THE RECENT ICE HOUSE FIRE. This picture was taken from the rail road tracks across the river from the burning structure.

Sudden End of Great Writers.

The anniversary of the death of Charles Dickens, synchronizing this year with the celebration of the Thackeray centenary, recalls in what similarly sudden death came to the two great novelists. Says the London Chronicle, Dickens, who was seemingly in his usual health on June 8, had a sudden seizure on the morning of June 9 and expired within a few hours. Thackeray, after a busy day in his library writing and correcting "Denis Davy" passed quietly away in his sleep on December 24, 1863. The end of yet another great Victorian writer was equally sudden. Sir George Trevelyan has told how on entering Macaulay's study one morning in December, 1859, he found his uncle sitting at the table dead, with the first number of the Cornhill Magazine lying before him open at the first chapter of Thackeray's "Level the World."

An Anti-Suicide Fence.

One of the strangest fences on record is that which the common council of Yonkers, N. Y., has just ordered built. It will be a fence to keep suicides away. Several times in recent years despondent persons have jumped off the Fort Reservoir, one of the reservoirs supplying Yonkers with water. Sometimes the bodies have been recovered quickly, but on a few occasions the corpses were in the water for a day or so. The loss of water in draining the reservoir is a big item and is especially to be guarded against since the city found it necessary to husband every drop of its supply. So the council has appropriated \$4,000 to build a wire netting fence around the reservoir. When it is completed any one on a suicide bent will find a barrier nine feet high between him and eternity.

The Wise Wife.

All people have their faults, and depend upon it, all men also have their virtues. It is the part of a wise wife to find those virtues and sedulously to cultivate them.—Exchange.

Original Meaning of Preface.

The word "preface" used in the beginning of books was originally a word of welcome to a meal, and was equivalent to "Much good may it do you."

Moods Unknown to Nature. Nature has no moods; they belong to man alone.—Auerbach.

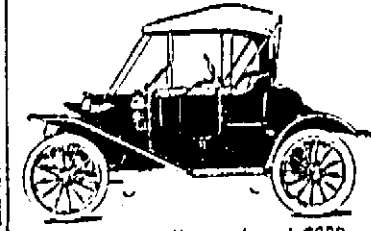

K-R-I-T

Has Perfect Score in Reliability Run.

This small roadster model is one of the few cars carrying a perfect score. It is the only car in the roadster class carrying a perfect score with one exception.

Covering over 985 miles through all kinds of road conditions, without touching a wrench to the machine or adjusting a single piece of mechanism in any way proves that the K-R-I-T must be built right.

Wait for the final report. It will be interesting.

This Car fully equipped \$800.

Robt. F. Buggs AGENT 12 N. Academy St. Both Phones 407

The Bird's Tail.

To slight extent in some birds the tail may be used as a rudder, but where the wing is perfect turning is effected with a very scant tail. The use of the tail always has more reference to the up-and-down movements than to the lateral. It comes into play in alighting (as a brake), or in rising (as a lifeline surface), and is used dexterously by the soaring birds in balancing themselves against varying currents of air.—James Newton Baskett, in "Story of the Birds."

The Judge's Joke.

Sheriff Guy is responsible for a Court of Session story. Once when the present Lord Justice Clerk was conducting a jury trial he made a small jest. The audience thought it their duty to laugh. "Silence!" shouted the mace in measured tones, "there's nothing to laugh at!"—Westminster Gazette.

Danger of Overtaxing Heart.

When one rises from the recumbent to the standing position, the law of gravitation tends to send the blood towards the feet. Hence there is an extra task for the heart in sending the blood to the head and a jammed one in sending it downward. If the rising is done slowly the heart accommodates itself to the altered conditions. But if the rising is sudden, the heart may be overtaxed.

Burn Requires Care.

Do not neglect a burn as soon as the first sting is passed. Should there be the least sign of inflammation or of pus accumulating call in a doctor at once. In case of bad burns it is sometimes necessary to wrap the victim in cotton to keep out all air. In such case the doctor would naturally be in charge.

Never in This State.

What heartless creatures some men can be! News comes from Ohio that the dean of a girls' school has been starving the deans in order to apply the board money to the school's debts. That could never happen in Texas, or Maine. We didn't say anything about New Hampshire.—Kennebec Journal.

A Perfect Road Score Buick

Five days have passed. Buick is still without a scratch. Buick still holds a perfect road score. Watch the Buick.

PRIELIPP BROS. 215-17 E. Milwaukee St. Both Phones.

What Does It Cost To Operate An Automobile?

That depends almost entirely on the make of car you buy. The first cost of some cars is little, and the operating, or second cost, is big.

The logical and safe thing is to consider the second cost first, and the first cost last.

In designing, in selecting material, in manufacturing Overland cars, no effort or expense is spared to produce cars that will give utmost service at the least possible expense.

That our policy is correct is amply proven by the unparalleled success of the Overland—the most economical car in the world both in first cost and second cost.

We want the opportunity to prove to you by actual comparison and demonstration the full significance of the strong statement just made.

Twenty-five thousand enthusiastic

owners will vouch for that statement in no uncertain terms. Below we reproduce one typical, unadorned expression. We have purposely selected from the mass the letter of a physician, because of all men, he is the one who must have an absolutely dependable, economical car for continuous service—summer and winter, day and night.

INDIANAPOLIS, IND.

OVERLAND AUTO CO., Toledo, Ohio.

Gentlemen—When I talked of buying an automobile more than a year ago, there was some many very important questions that no one was prepared to answer. They were concerning the upkeep of the machine. I have kept a careful tabulated account of my year's expenses, and am glad to furnish you with this information.

With the exception of ten days' sickness last winter, my machine has been run as a physician runs a machine in his practice scattered all over the city, besides taking many pleasure rides of evenings and some Sunday rides to adjoining country towns.

My gasoline cost me for the year	\$58.67
Lubrication oil	8.65
Transmission grease	2.63
Anti-freeze fluid	3.25
Battery coils	4.25

This makes for the year an average of 21½¢ per day for actual running expenses.

Other expenses, including all supplies and mending tubes, tires, patches, etc., as well as license and all expenses connected with owning a machine, cost an additional 23½¢ per day, making a total of 45¢ per day. I have not heard of any car that compares with the Overland in economy for upkeep.

Yours for the Overland!

W. H. STEWART, M. D.

If, of course, impossible for any one to say how much it will cost an owner to operate his car. There is a wide range of difference in conditions and in drivers. The very nature of Overland manufacturing methods insures a car that must perform be efficient, reliable and economical. We know from own experiments and from the actual experience of the Overland owners that it offers the greatest automobile value when purchased at less cost than any car of similar rating. We make five models, all with high duty, quiet, four cylinder motors, from 20 to 40 horse-power. There are twenty-two body styles, priced from \$775 to \$1675. This car shown below is model 51, with fore-doors and center control, that is to say, the shifting lever and emergency brake lever are inside the car in the center at the left of the driver. Notice on other fore-door makes the levers are outside, proving that the body is patched up with the fore-door to meet the latest ideas. Model 51 has a thirty horse-power, four cylinder motor that is a marvel of efficiency, quietness and reliability. Dual ignition, magneto and battery, 110 in. wheel base, seats five people, tires 34x3½ in., three speeds reverse and selective. Brakes internal expanding, external contracting.

HUPMOBILE

Guaranteed For Life

There's style and strength in every line of the Hupmobile. Better style you cannot buy at any price. You can buy more power and larger size, but, do you need it? The Hupmobile comes to you this season handsomer and better than ever, with fore-doors, wider fenders, Vanadium springs and a host of improvements and refinements.

BUILT LIKE THE BIGGEST AND BEST

You will find in the Hupmobile construction the very highest grade of materials and the same skillful workmanship that goes into the highest priced cars on the market. You get sliding gear transmission, Bosch magneto, Timken bearings, such as are used only in the more expensive cars. In fact, the Hupmobile gives you everything you can get in the biggest and best motor cars with the exception of size.

In addition you get our absolute guarantee for life, which means that any time during the life of the car we will replace any part which shows a defect either in material or workmanship. There are no conditions attached to this guarantee and we aim to be as liberal as possible in its execution.

SPECIFICATIONS OF TOURING CAR.

MOTOR—Four cylinder; 20 H. P.; water cooled; 3¼ in. bore by 3½ in. stroke; offset crank shaft; three piston rings; Parson's white bronze bearings; noiseless, crank shaft; all valves on left side, adjusting nuts on valve stems; spark plugs over inlet; splash lubrication with positive automatic oil feed; going 150 miles on supply.

TRANSMISSION—Selective sliding gears; two forward speeds and reverse; shift without noise; contained in crank case; extension forming unit power plant runs in oil; one universal joint at rear of transmission in dust proof casing; lubricated by oil from crank case.

CLUTCH—Multiple disc type; tension adjusting plugs on clutch springs; ten plates used; enclosed in gear case and running in oil.

REAR AXLE—Shaft drive; propeller shaft enclosed within steel tube which takes all torsion; differential housing well ribbed; Hyatt roller on outer end of axle; axle ends tapered.

BRAKES—Two-foot brakes acting in rear wheels; two emergency brakes in rear wheels; both internal/expanding; 10-inch drums; non-burn lining.

FRONT AXLE—Drop forging; I beam section; integral spring seats.

SPRINGS AND FRAME—Frame pressed steel tools, and complete repair kit.

channel; four cross members; springs two semi-elliptical front, one patented cross spring in rear; oil cups attached to all spring bolts.

STEERING GEAR—Rack and pinion type; simple and very positive; fifteen inch steering wheel with aluminum spider; steering column set at rakish angle.

CARDURETOR—Float feed; automatic; hot air connection; accelerator pedal fitted; hand throttle lever beneath wheel.

IGNITION—Bosch high tension magneto; no battery coil or complicated wiring; fixed spark with no spark control lever; the same of simplicity.

COOLING SYSTEM—Mercedes type radiator; vertical tubes and straight fins; thermo-siphon system of circulation using three gallons of water.

FINISH—Hupp blue body with highest finish; white; striping; gray wheels; tires: front 30x3, rear 31x3½.

WHEELBASE—110 inches.

REGULAR EQUIPMENT—Fore-doors; standard high grade top; zig zag wind shield; mirror lens headlights, mounted on specially designed head sets; gas generator; 3 oil lamps; horn; tools and complete repair kit.

WEIGHT—1600 pounds.

PRICE \$900 Fully Equipped. Write or phone for Demonstration to.

MOTORING

MACHINES LEFT ON LAST LAP OF TOUR

SIXTEEN CARS IN STATE RELIABILITY RUN LEFT FOR DELOIT AT SEVEN THIS MORNING

RUN INTO CREAM CITY

Route to Milwaukee Via Deloit, Kenosha and Racine Was Taken, Cars Reaching Destination This Afternoon to Be Checked in and Scored for Award of Prizes.

Starting on the last lap of reliability run of the Wisconsin State Automobile association, the sixteen remaining cars of those entered in the tour, left Janesville shortly after seven o'clock on their way back to Milwaukee, via Deloit, Kenosha and Racine. At half past five o'clock the travelers were served breakfast and at half past six were drawn up in front of the Myers hotel, with their cars facing south,

rate owners' cars. This machine, which was the secretary's car, was forced to lay over in Stoughton for some time. Both rear springs of the auto were broken and although they had been patched up before it was impossible to continue with them further. Rather than give up continuing with the run, though, Mr. Shandlen made arrangements with the Mandt Wagon Works to have them work their force overtime last night in order to refit him wear rear springs and it is understood paid fifty dollars for the repairs. He arrived in this city last night at 10:35, the last of the cars to reach here.

Four Cars Penalized.
The Kluge Kar, second press car, in which Leonard Meyers of the Milwaukee Evening Wisconsin and Munson of the Watchman were riding, had considerable engine trouble, the motor overheating in climbing grades and along had to be made at the top of each strenuous hill to replenish the supply of water. The machine checked in at the Myers hotel at 7:20.

Four cars were penalized by the committee after yesterday's run, the penalties being posted in the lobby of the Myers hotel last night. The Ford car, No. 6, which up until yesterday had gone through with a perfect road score, was penalized one point for justifying the carburetor, but the driver,

chines to be checked in was No. 3, a Buick; D. Neallago, driver; Homer Davis, observer, at 4:32. Just a half minute later No. 11, National, Charles Merz, driver; W. R. Read, observer, arrived and No. 12, Overland, John Heber, driver; J. B. Zimmer, observer, and No. 13, Franklin, J. D. Hancock, driver; P. F. Volrich, observer, came in a minute afterward. They were followed close by No. 2, Emil Hokanson, driver; John E. Nelson, observer, and the Auburn, entry No. 102, in the private owner's class, C. Hacksdorf, driver; Ed. Dunsold, observer. Entry No. 1, Cadillac, Aug. Jonas, driver; E. J. Kettlbaum, observer, was the seventh to arrive at 4:45.

The other cars arrived in the following order: Press car, Rambler, Manning Vaughn; Sentinel, Waldo Rowland, Journal; Edward Bohand, Free Press; W. G. Kellogg; Frank Roessler, driver; 4:40; No. 4, Buick, Munson, driver O. L. Schaeffer, observer; No. 15, Warren-Detroit, H. D. Beckstead, driver; Charles Johnson, observer; No. 6, Ford, W. H. Diner, driver Dr. Otto Kloehn, observer; No. 7, Imperial, Crumpton, driver, Dr. H. S. Roby, observer; No. 5, Reo, A. J. March, driver, Percy Pybus, observer; No. 14, (fourteenth to arrive) Regal, C. H. Delafeld, driver; J. A. Smith, observer; No. 8, Imperial, Harry Blush, driver, L. J. Alderman, observer. The physicians' car, with Dr. Louis Buhner, Dr. F. H. (thor) man, and R. D. Gorham, checker, reached this city at 7:04.

NOTES OF THE RUN.

In the car with Emil Hokanson, driver of the No. 2 Buick, was R. E. ("Hobbs") Knoff, city editor of the Wisconsin State Journal at Madison, a former Janesville resident. Hobbs's face had been badly sunburned on the trip and to protect his face while riding he wore a pointed straw hat of very gay colors. With the coat of sunburn, the straw hat, and a pair of goggles to protect his eyes, it was quite difficult to recognize the former Janesville man.

Assemblyman Grant U. Fisher accompanied the motorcade on today's run to Milwaukee, being a guest in the physician's car.

Two of the drivers who took part in the races on the Indianapolis Speedway are driving cars in the reliability run. They are: Will Jones, who drove a Case car and was at the wheel of No. 10 Case in the run and Charles Merz, driver of No. 11, a National, who also guided a car of this make in the Indianapolis races.

Near Dodgeville yesterday, where the route of the run crossed the railroad tracks the assistant pilot's car came along just in time to discover two boys making off with the red flag which had been put up as a guide for the motorists and loading the confetti thrown on the road into a small cart. The "riot act" was read to the youths and the guide marks replaced, the mother of the boys promising to see that the incident was not repeated.

Angie Jonas, driver of the Cadillac, entry No. 1, whose face was badly swollen as the result of a wasp sting, resumed his place at the wheel yesterday, the swelling having been reduced sufficiently to allow him to see to guide the car.

Tired out by the day's journey, on account of the early start made yesterday morning and wearied by the worries of the tour, M. C. Moore, pilot of the run and president of the Wisconsin State Automobile association, went to bed yesterday afternoon shortly after the pilot's car reached this city. He resuscitated his strength, however, after several hours' rest.

A band concert was given last evening in front of the Myers hotel for the tourists. Dr. R. W. Edden, president of the Janesville Automobile Club and director of the state association, providing this entertainment for the tourists.

Contesting cars in the run were parked along South Main street in double rows, about half way along the street in front of the Court House park. Tarpsaulna were placed over them and two watchmen guarded the machines during the night. Some of the officials' cars, which were not required to observe the rules of the run were quartered in garages over night.

Precious Sea Salt.

No existing sea salt is chemically pure and perfect as it should be, for then the precious, frail iodine, the best thing of all, would be in it. This sea salt iodine, hyper-tonic for the blood, was why old-time Jap doctors gave sea moss or agaragar as a spring tonic. Pure sea salt would be hard to get and keep whole and perfect, but, regardless of expense, it should be gotten, as biologic food.

Quite So.

"Many a man," remarked the home-grown philosopher, "spends his courtship days in telling a girl that he is unworthy of her, and his married life in proving it."

Effective Silence.

Silence is a figure of speech, unanswerable, short, cold, but terribly avowed.—Parker.

A Perfect Road Score Buick

Five days have passed, Buick is still without a scratch. Buick still holds a perfect road score. Watch the Buick.

PRIELIPP BROS.

215-17 E. Milw. St. Both Phones.

FORTY YEARS AGO

Janesville Daily Gazette, Saturday, July 22, 1871.

The Paper Mill.

O. L. DeForest has received another letter from P. S. Allen of Kankakee, in reference to establishing a paper mill in this city. Mr. A. has the machinery for a mill of that description and desires to locate here and writes to know if the business men of Janesville are willing to start a stock company and build a large mill or to give aid to an individual who desires to open a smaller establishment. The board of trade should consider this proposition.

Railroad Meeting.

There will be a meeting of the citizens of Janesville at the old court room, on next Monday evening at seven and one-half o'clock, to consider the subject of helping in the construction of a railroad from this city to Deloit. All taxpayers and persons interested in the growth and welfare of our city are requested to be present.

Accident.

An accident occurred to Mrs. Lovi Carle, residing in the Fourth Ward,

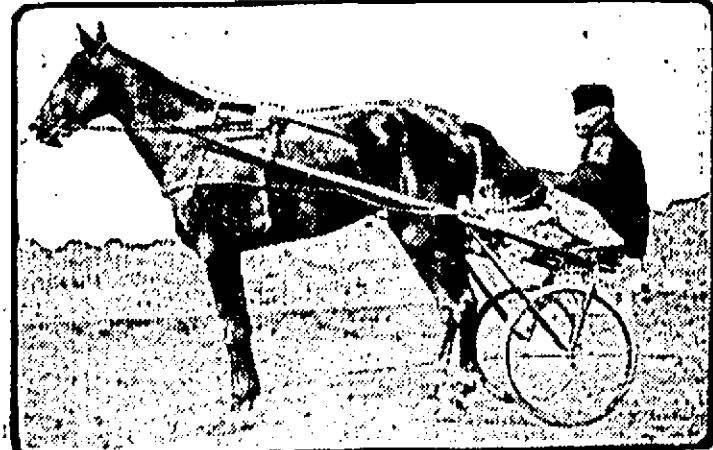

last night, which resulted in serious injury to that lady. Imagining that she heard burglars in the house during the night, she arose and started down stairs, but missing her footing in the darkness, fell the whole length of the stairway, breaking her jawbone, and otherwise injuring herself about the face.

Apple Trees in Tubs.

In Germany dwarf standard pear and apple trees about four feet tall and pyramidal in form are grown in small tubs for decoration. The trees bear from ten to 30 pears or apples which, when nourished with marlate of potash, are highly colored and effective both in the blossom and the fruit.—Helen Rotherford in Scribner's.

Factory Tied Up by Eel.

A factory at Burnley, Scotland, was tied up the other day through an eel which had come from the river Calder getting into the condensing apparatus attached to the boiler. The machinery had to be stopped till the fish was extricated.

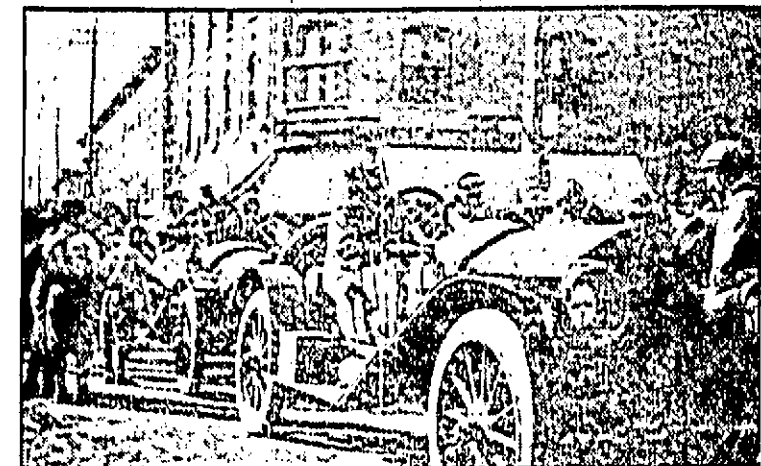

EASY WINNER IN GREAT CIRCUIT RACE.

Dudley Archdale, taken just before the 2:07 pace which she won easily, winning a purse of \$2,000 in the Great Circuit race now being held at Kalamazoo, Michigan.

"Pop" Geers had an easy time and did not have to push the winner, easily picking-off the first two wheels.

READ GAZETTE WANT ADS

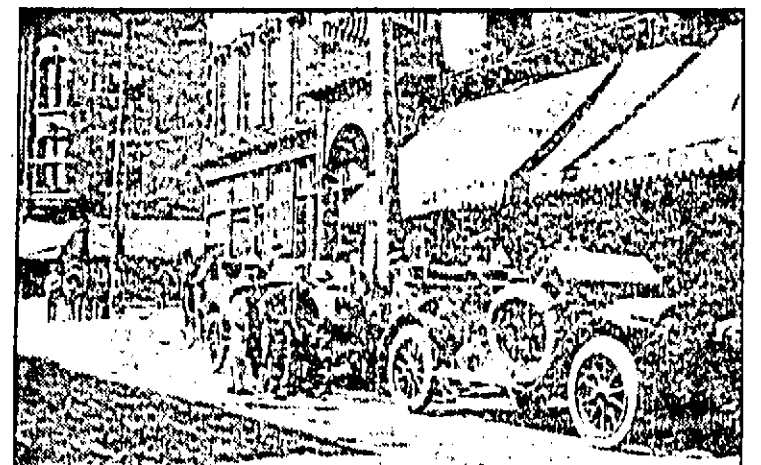

CARS ENTERING THE CONTROL THE NATIONAL AND OVERLAND

ready to start. The first car left the control at seven o'clock sharp, and the rest were checked out one minute apart.

Take Early Leave.

The pilot car, an Imperial, left the hotel this morning at quarter past five o'clock, the remainder following it at six. An early start was made today in order to check in all the machines at Milwaukee this afternoon, score them, and award the prize. Cars penalized on the road lose only on their road score at that time, but when the cars reach Milwaukee this afternoon, penalties for all accidents, such as broken lamps, blowouts and other injuries suffered are exacted. Careful measurements are made of each car returning to Milwaukee and

The results up to date:
No. 1—Cadillac Perfect score
No. 2—Buick Perfect score
No. 3—Buick 16 points

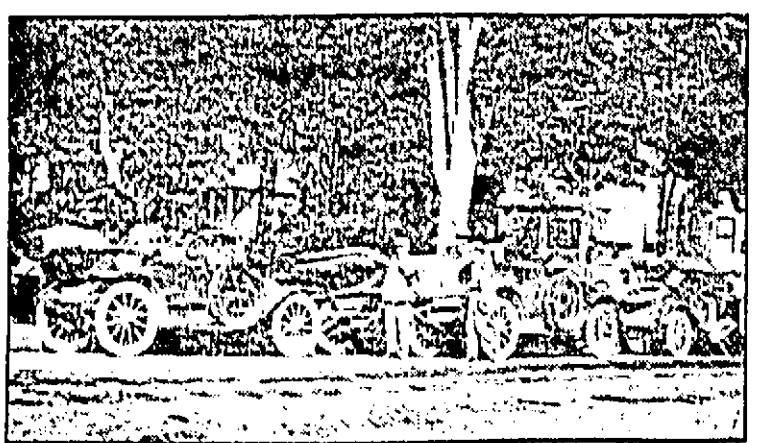

TWO OF THE AUTOMOBILE CONTESTANTS.

these are compared with those taken at the beginning of the run.

Observers on the trip were changed from car to car each day. The driver of each car was given the choice of one observer, who could not serve on that particular machine. At the end of each day the executive committee selected the observers for the following day and the cars in which they would ride.

Best Day of Run.

Yesterday was the most perfect day of the run the automobilists had had up to this point. Leaving Lancaster yesterday morning the motorists went to Platteville, from there to Darlington, Darlington to Mineral Point to Dodgeville to Madison and from Madison to Janesville via Stoughton and Dodgeville, a distance of 154 miles.

RELIABILITY AUTOS LINED UP IN FRONT OF PARK.

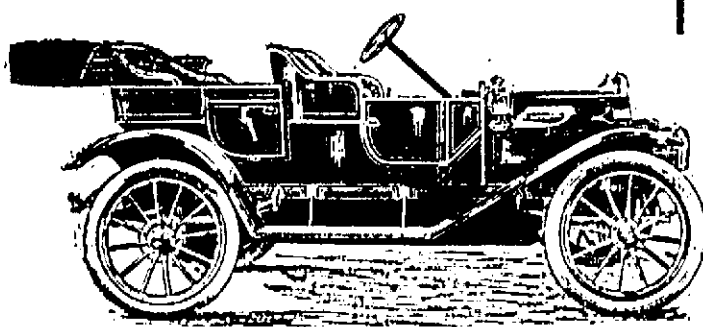

Roads encountered on yesterday's trip were the best over which the travelers had passed and quick time was made. Little trouble, too, was experienced with the machines. There were, however, several blowouts and springs broken, but these machines were not penalized on the road score.

One Bad Accident.

The most severe accident of the day was to the big Palmer-Singer car owned by Emil Schandlen of Milwaukee, assistant secretary of the run and donor of the Schandlen trophy for per-

formance of the technical committee and Fred Baucher, driver. They arrived a few minutes after three o'clock. Close behind them came the assistant pilot's car, containing A. P. Cheek, chief checker, Messrs. Davis and Irwin and Martin Lechhold, driver. The mechanic's car, M. S. Sheridan, referee; H. L. Halverson, chief of observers; John W. Tuttle and Leslie A. Clark of the technical committee, and William Road, driver, reached here an hour and a half later. The first of the contesting ma-

"The Car Ahead"

\$1,150

Model "H" 30 H. P.

The Carterear has won its way to popularity because of its distinctive features.

It has a Friction Transmission which gives any number of speeds you desire. You can drive behind a walking team on high speed, if you wish.

The Chain-in-Oil drive delivers a very high percentage of power to the rear wheels. This enables the Carterear to travel roads other cars cannot.

Model "H" 35 H. P. Touring Car, \$1600.

REO PROOF BEFOREHAND

That is what the Reo has to offer you

New York to San Francisco in 10 days, 15 hours and 13 minutes proves POWER, SPEED, RELIABILITY and STRENGTH

REO has present proof to offer you. One of the very few cars in the Reliability Run with a perfect score

This run proves a car, negotiating, sand, mud, clay, hills for several hundreds of miles brings to the surface any imperfections of designing, material, workmanship. The fact that the Reo has a perfect score thus far after covering over 985 miles. It's a record. It proves that the Reo must be designed correctly, contain the best materials and be assembled in an expert manner.

Prove comfort and smooth-running by a ride in a Reo, arranged at your convenience.

And you get the Reo any way you want it—with or without fore-door, fixed and detachable; or the door by itself, to put on whenever you want it.

Five Passenger Fore-Door Model
\$1,000

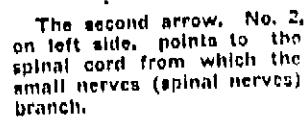

Compare this car point by point, with the highest priced cars in the world, as well as with cars at or near its own price.

This new price, \$1000, is for the new 1912 models. The time has come when it can be done—that's all. The Reo car has become standardized; the factory has been put into such a system and discipline that it works to the limit of economy and efficiency same with the sales department, and this better price for a better car will increase the sales of the Reo to such an extent as to make possible further economies throughout the whole organization.

DURNER & COURTIER,

Agents for Green County and North three-quarter of Rock Co.
EVANSVILLE, WISCONSIN

Arrow No. 1 on the left side points to a normal nerve. Notice how large it is. This nerve can transmit all the mental current from the brain to the organs it leads to, that is necessary to keep those organs in perfect health.

Notice the arrow No. 3 at lower left side, pointing to the great sciatic nerve which is a full and perfect nerve leading down the leg. With a nerve like this you could not have sciatic rheumatism or any other disease.

See arrow No. 4 on lower right side, points to the sciatic nerve. This nerve is pinched by subluxated vertebra. Notice how small and shriveled up it is. In this case you would be subjected to any disease such as sciatic rheumatism, acute or chronic, cramps, coxalgia, hip joint disease, housemaid's knee, stiffness of the leg, swelling of the foot, varicose veins (or milk legs) and consumption of the bone.

Notice the next three rows, Nos. 5, 6 and 7, from the bottom upward on the right pointing to the 2nd, 3rd and 4th lumbar nerve, all wasted away. Here is where appendicitis, lumbago, abdominal pains, hemorrhage of the bowels, piles, peritonitis, constipation, consumption of the bowels, and cramps of the bowels, etc., will be found.

Notice the arrow, No. 11, on the upper right side, pointing to the cervical nerve passing out between atlas and axis (or two upper cervical); also the next nerve below. They are both pinched and shirveled up so that they can not get on their normal mental impulses, though them, which is life, and if your neck is in this condition you will have any disease pertaining to the part of the body, such as catarrh, deafness, paralysis of neck and brain, epilepsy, brain fever, epistaxis, catarrh, dizziness, epistaxis (nose bleed), insanity, torticollis or wry neck, rheumatism of the neck, etc.

Notice the second and third arrows, Nos. 9 and 10, pointing down on the right, to the lung, the head and stomach. In this case you will be subject to any disease pertaining to this part of the body, such as leakage of the valves of the heart, myocarditis, rheumatism of the heart, consumption, pleurisy, rheumatism of the ribs, stomach trouble, anorexia (loss of appetite), abnormal appetites, bad taste, belching of gas from the stomach, cancer of the stomach, abscesses of the stomach, indigestion, acute or chronic ulcers, gastritis, heart burn, hemorrhage of the stomach and sick headache.

See fourth arrow from the top, No. 8, down, pointing to the kidney nerve which is the cause of kidney trouble such as Bright's disease. Addison's disease renal or kidney gravel, diabetes insipidus, diabetes mellitus, floating kidney, dropsy, dryness of the skin, blackheads, boils, pimples, granular eyelids, hemorrhage of

the kidneys, rash and nephritis (inflammation of the kidneys).

CONTINUOUS doping with medicines for years brings about dried up tissues and ill health. The human system cannot stand all the noxious drugs you pour into it. All drugs are poison and exhaust instead of build up the patient. Medicines and drugs are simply irritating poisons which kill the nerves in the end and some chronic disease or death is the result.

There is a way out. Hundreds of sick and ailing ones who had been dragging out a miserable, weary existence, suffering and hopeless, victims of the drugging habit have been restored to health by Chiropractic adjustments—no medicine—no cutting—no mystery—simply common sense—that's all.

Chiropractic, the science to which we devote ourselves, is not medicine or medical treatment. It is a scientific knowledge of the spine and nervous system. If one has a disease it is simply the manifestation of a cause and the cause may be located in the spinal column. All disease, excepting such as are manifestly due to traumatic injury, is due to a pinching of the nerves emerging or entering between the vertebrae of the spinal column, causing a lack of mental impulses in the organs directly affected, and resulting in a loss of their usual functions, causing disease. We know the anatomy of the spine so thoroughly that we have no difficulty in locating the trouble and correcting it. Normal functions are restored and the diseased condition disappears—disease cannot in fact, then exist in the harmoniously working mechanism of the human body.

For years it has been the claim of many advanced thinkers among whom can be included members of the leading physicalists that drugless healing would eventually become the accepted theory in curative methods. Chiropractic is the rational method of drugless removal of disease, and that fact can be demonstrated to the satisfaction of any sufferer who will make a practical test of it in their own case.

Many sufferers who have been made well gladly tell of their experiences. Here's one instance:

TO WHOM IT MAY CONCERN:

TO WHOM IT MAY CONCERN:

I am 26 years of age. I suffered 3 years ago with tumor of the left side of my face just in front of the ear and upon consulting a prominent physician of Milwaukee I was told that I would have to be operated on as it was inoperable and that by an operation I would be free from all my trouble, and was operated on three different times in a year and a half and this same Doctor said that if I would follow it up with the X-Ray treatment I would come out all right. So when I came to Holoit I took X-Ray treatment here for three times a week for seven months. The left side of my face became so paralyzed that I could not move it and my left eye remained open day and night. Then he told me that the muscles of my face were weak and that I would have to wear glasses, and that they would relieve them. After spending about \$1000.00 for treatment, I was worse off than before I started.

[illegible]

MRS. O. PETERSON,
741 Eighth St.,

REMEMBER, consultation and examination are free. If you are a victim of the medicine habit or are in ill health or suffering call at the office and learn more about this wonderful science of Chiropractic.

WOMAN'S PAGE

HEALTH and BEAUTY
Mood Helie

Water is seldom appreciated at its true value as a beautifier, although it is frequently recommended by physicians and occasionally advised by beauty specialists. Quite possibly, if it came in fancy jars or bottles with a round price attached, we would give it greater consideration, but as long as it is both cheap and handy we are apt to overlook it as a helpful agent in our search for the magic remedy.

The body requires a great deal of water to supply its needs, and unless the necessary quantity is furnished, the skin suffers as well as the health. At least three pints of cool—not iced—water should be drunk every day. This flushes the system, carries off the impurities and gives the body its normal supply. Whether water should be taken with the meals is a question for the individual to decide. Much is said for and against the practice, but the three pints a day should be taken as regularly as you perform any other of your daily duties.

The first glass of cool water taken upon arising is the most refreshing medicine you can find, and the last glass at bedtime will do much to rest the nerves and make the sleep quiet and restful. The other eight glasses can be taken to suit your convenience. The necessity for water drinking must be especially impressed upon the woman whose skin is dry and with a tendency to wrinkle, and the woman who has a sallow skin or whose complexion is marred by blotches that are equally generous in the amount of water taken into the system. In both these cases wonderful improvement is sometimes brought about by the faithful following of the above directions and the complexion clears out, the yellow look disappears and the texture of the skin changes in a surprising way after a few months devoted to the simple "water treatment" described.

If the body is over-burdened with fat, a lithia tablet in the glass of water will prove helpful. If the system shows an excess of acid, a tiny pinch of soda will sometimes correct the trouble. Just a little bit of soda—hardly enough to change the taste of the water—is advisable. When constipation exists, the water drinking will be often found a specific and will usually benefit all ordinary cases. Where the constipation is chronic or serious, a teaspoonful of ordinary table salt dissolved in the first glass of water taken before breakfast will some times afford relief.

When constipation exists, the water drinking will be often found a specific and will usually benefit all ordinary cases. Where the constipation is chronic or serious, a teaspoonful of ordinary table salt dissolved in the first glass of water taken before breakfast will some times afford relief.

Practical Housekeeping.

Saving Time and Energy in the Kitchen.

HERE are many little ways by which a woman can save her time and energy in the kitchen. Some women think these things out for themselves. But others give little real thought to the matter, and so walk miles that are unnecessary and make themselves, as well, much unnecessary work.

Most housewives have their own plan for the day's work. Some go to market immediately after breakfast and wash the dishes upon their return. Others do the kitchen work first and market afterward. But whatever the plan may be, it is a saving of time and energy to handle the marketing but once if this can be managed. That is, when the basket of marketing is brought in, instead of putting all the purchases away, and then going and getting them again when they are needed to prepare for the luncheon or dinner, lay the articles needed for luncheon or dinner where they will be wanted when the time comes to prepare them, and put the other things away. If the housewife can prepare these at once, it will mean just that much less handling, and all these little things count. They run away with time and energy just as neglecting to look after the pennies runs away with the dollars.

If all plates from the table and all cooking utensils are scraped clean before washing, it means less cleaning of the sink. Some housewives after making bread or pies, wipe the little remaining flour or bits of dough that may cling to the board, into the sink. This simply means that these have to be taken up from the sink and put into the garbage receptacle—two operations instead of one. It is a waste anyway to throw such flour or dough away. It can be used in other ways—but that is another story.

If when articles are to be put into the refrigerator, they are collected together on a tray, they can be carried to the refrigerator and put in all at one time, thus saving many steps and much time. The same method holds good when things are taken from the refrigerator. Some housewives when preparing a meal run to the refrigerator for every single article they want. This means a trip there and back each time, an opening and shutting of the refrigerator door many times. This lets the heated air of the kitchen into the refrigerator to work destruction with the ice. Not all things of course can be kept out of the refrigerator for any length of time. But during the preparation of a meal many things can be. If the housewife who is careless in this matter will give a little thought to this part of her work, she will soon see she can effect a saving of steps and of ice in her refrigerator management.

A well known authority on domestic economy says she never washes her refrigerator because of careful management she makes this work unnecessary, thus saving much labor and much ice. All the green things which she puts into her refrigerator, she puts into paper bags first. There are no pieces of salad or parsley or celery to litter the refrigerator. She is equally careful about other articles of food which she places in the refrigerator. She does not use dishes or pans so small that pieces of food fall off or liquids are spilled. If an accident does happen, all traces of it are immediately wiped away. By this method there is no wholesale clearing out of the refrigerator once a week while it is scrubbed, the ice meanwhile melting and the refrigerator becoming warm.

Although all housewives may not wish to go to this length, there is something in what she says that will help reduce the work of the kitchen. By taking this care the refrigerator need not be cleaned so often, and perhaps the part where the food is kept, not at all. But some of us like to wash out the ice-chamber and flush the drain-pipe occasionally because the quality of the ice is not always all that can be desired.

SUGGEST SOMETHING FOR ENTERTAINMENT FOR SUMMER MONTHS

The Gazette Feature Editor Desires Opinions of Readers on Important Matter.

Even the ordinary ways of providing entertainment and amusement for the family and guests in the summer time may be varied in such a way that they will seem new. There is always a charm to an evening launch ride but what new departure can you suggest for passing the time that you spend at the cottage or ideal grounds before the return journey?

What sort of excursion or diversion do you provide for your family during July and August? Nearly every family has plans of its own for amusement and these will be interesting to the readers of the Woman's Page.

The Feature Editor has made the scope of this contest rather broad so that it will include a wide range of subjects which may be taken as topics. Plans for luncheons or dinner parties are admitted and will be a very fertile field for those who are especially proficient in this line.

In case there are any persons who do not entirely understand what the scope of the contest is and what will be accepted, and questions which are mailed to the Feature Editor will receive prompt attention and will be answered in the columns of this page.

Your articles must be in this office by the first of August to be entered in the competition. They should be written on one side of the paper only and should be addressed to the Feature Editor, care of Gazette.

First Prize—Colorful Fireless Cook-stove.
Second Prize—Set of 45 pieces of Flow Blue Dishes.
Third Prize—Vacuum Bottle.
Fourth Prize—Sanipon Kitchen Scales.

The contest will end August 1st.

The Kitchen Cabinet

The Kitchen Cabinet

HOUSEHOLD HINTS.

There has been much said about the lost flavor of grape juice after it has been bottled and bottled. The agricultural bulletins tell us that it is unnecessary to boil grape juice in order to preserve it. Heat to 165 or 175 Fahrenheit, and the juice will not lose its delicate flavor and aroma, but will keep indefinitely. The bottles into which the juice is put should be carefully sterilized and as carefully sealed. If cotton batting is tied over the cork, mold cannot enter. Another thing to remember is that the bottles should be filled to overflowing.

When all dishes that have contained egg or dough with cold water, as hot water has a tendency to cook the substance and makes it harder to remove. Remember if you want a good running egg beater, never to allow the eggs to become wet.

If grease is spilled on the floor, pour a little cold water on it at once. This causes it to harden, and it can much of it be scraped off with a knife. Sprinkle a little soda over the spots and let it absorb the rest.

A long-handled crocheting hook is a good utensil to keep in the bathroom to remove lint from the washbowl and bathtub drains.

Remember to wipe the milk bottle carefully before pouring out the milk. When travelling, carry a few flaxseed in the bag, and if one is unfortunate enough to acquire a choker in the eye, drop in a moistened seed, and it will soon gather it up. If it has penetrated the eye sometimes a piece of chewing gum rolled into a needle-like point will fish it out.

Mosquito netting makes a fine dishcloth. Take a large piece and double it, quilting the folds together. It is soft, easily wrung, very absorbent and so inexpensive that they may be thrown away when gray and discolored.

Elevate the feet for ten or fifteen minutes when they are tired and swollen from walking, and they will be greatly rested.

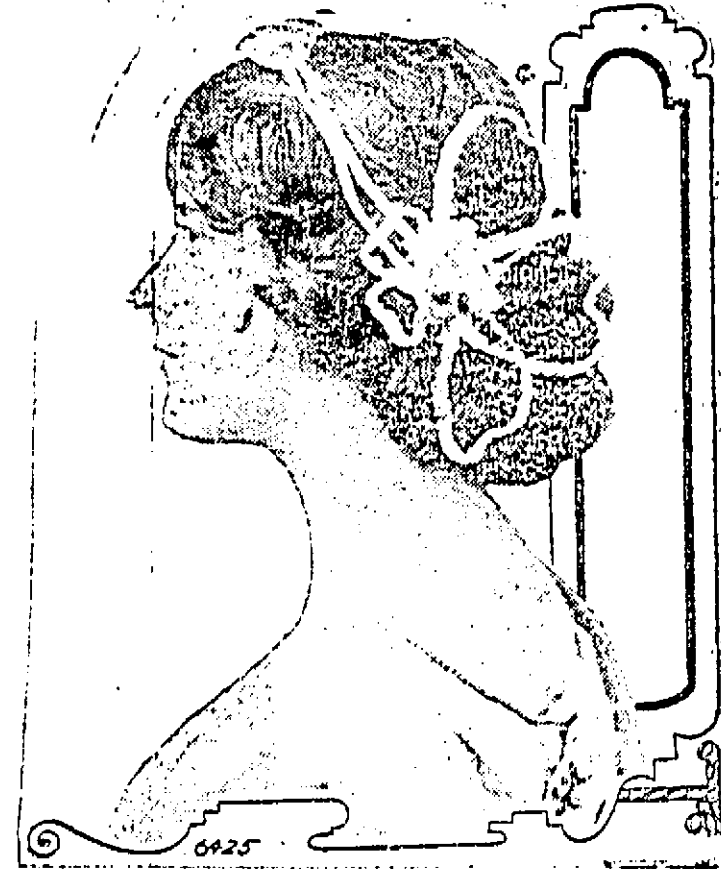

Nellie Maxwell.

Clean the Feedplate.
Your sewing machine will last longer and run more easily if, especially after working on woolen goods, you clean out the feedplate. Take out the screw that holds it down and lift it out; then, with a long pin, pick out the lint and clear the needle slot.

You will be amazed at the amount of lint that can accumulate there, and when you have replaced the plate and the screw, at the increased efficiency of the machine.

Effect of the War.
A woman at a chandler's shop bought a half-penny candle was told the price was raised to three farthings.

"What's that for?" she asked.
"On account of the war, good woman," was the reply.
"Confound them!" she exclaimed. "Do they fight by candle light?"—Punch.

A Diamond Collar Ornament for Low Hairdressings.

Youthful and pretty is this hair ornament made of pale blue ribbon, shirred over that wire and looped in to heart forms. The ornament is attached to two bands of twisted blue ribbon on which are sewed tiny rhinestones in the popular diamante effect. The heart shaped ornament is worn only on one side of the collar, the opposite end of the rib being finished with a simple chain of ribbon. This ornament could be copied in any desired color and small pearl beads or colored stones could be substituted for the rhinestones.

The Evening Chit-Chat

By RUTH CAMERON.

MY DEAR Miss Cameron:—Having noticed that you occasionally ask suggestions from your readers, I thought I would write to you.

"Some time ago I was greatly troubled with insomnia and the physical evils consequent thereto and, after trying different remedies and undergoing the usual doctoring with no results, I finally tried the very simple plan of sleeping on a pillow of hops, and much to my surprise was speedily cured of this nerve-racking complaint."

"Should any of your readers complain to you of the same difficulty, you would be doing a world of good by suggesting this scheme, which is all the better because it is devoid of drugs, and does not appear to leave any after effect which most drugs do."

"I have recommended this plan to several friends who were similarly benefited. I would add, however, that a friend, a physician, tells me that different persons often require different treatment and that he seldom found two cases exactly alike. Nevertheless I firmly think the use of hop pillows for this malady is worth a trial."

"Three cheers for that man! I don't know whether his remedy is valuable or not, but I do know that I'll try it, because he is the kind of man the world needs more of, the kind of man who cannot make a discovery or receive a benefit or blessing without feeling an obligation to pass it on to the rest of the world."

I trust both his remedy and his example will prove of value.

Here is a suggestion for the "put-away" season from a clever house-mother who is the wonder of the mothers of the neighborhood for her skill in the art of freshening and making over half worn clothes.

"When I put away my winter dresses I always put them away clean, because it's much harder to get the dirt out when things have been lying dirty all summer. It doesn't matter how much I hate to do it now—I'll hate it just as much in the fall."

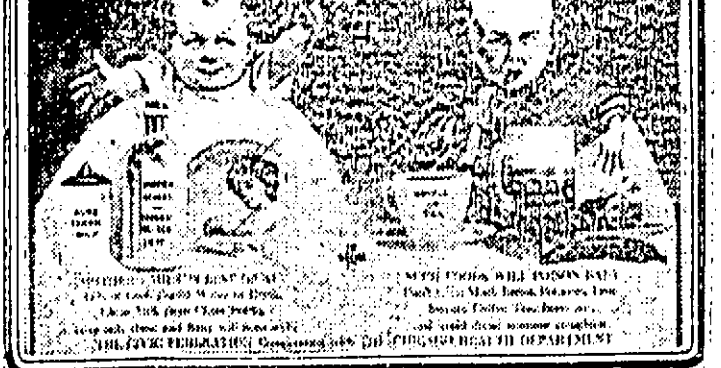

"But you asked me how it was I managed to make the children's half worn clothes look as good as new and what I started to say was this: Very often instead of sponging or naphtha cleansing our woolen clothes, I wash them in soap and water."

"People seem to think that dark clothes don't get dirty because you don't see the dirt, but it's really there just the same and I don't think it's healthy. Just imagine if you wore a white dress day in day out all winter what it would look like. And then remember that the same amount of dirt is on your dark blue serge, only it doesn't show and it's enough to make you sick. And besides that side of it, dirt clogs clothes and makes them wear out more quickly. Now naphtha takes spots out but it doesn't clean things like soap and water. So when I have a dress to make over I flip it up and then wash the pieces thoroughly in soap and water. That's what makes my made-over things look new. Sometimes when I want to freshen up a dress I take the skirt to pieces and wash it and sometimes when I have an old dress that I'm not afraid of shrinking, I put it right in the tub just as it is and give it a good scrub."

"You would be surprised at the wonders I've worked on old woolen clothes with soap and water."

"Wouldn't he be the right way to express it."

"Have been" would be much better.

THE CAMPAIGN THAT SAVES BABIES' LIVES.

Picture used in campaign of education showing the normal, healthy baby at the left with the food and drink upon which it will thrive. At the right, a typical sick baby of the sums and the things which it should not eat and drink.

This cartoon was drawn by Ralph Wilder and was sent out under the caption, "Don't kill your baby."

Below, Henry M. Bylesby, chairman of the Executive Committee of the Civic Federation of Chicago.

Chicago, Ill.—For the past two years the Civic Federation of Chicago has been accomplishing wonderful results in the way of educational campaigns for the masses, particularly as they have pertained to the welfare of the child. Last summer, through their efforts, a remarkably low death rate among babies. This year they are entering the campaign with renewed vigor and energy and among other features have sent out thousands of the cartoons above pictured printed in four colors and in many languages under the scare head, "Don't kill your baby."

The cartoon depicts the normal and healthy baby and what they should not.

TALK TO HOUSE-KEEPERS

(By Nellie L. Horn.)
"A PIECE OF SIMPLE GOODNESS."
—Jerrald.

Through the different cake recipes would fill a large volume, all of them may be divided into two classes, the butter cake and the sponge cake.

During the hot weather, one of the simplest and most delicious of the lightest texture appeal to the housekeeper. One of the newest, most wholesome cakes is the Graham Cracker Cake. Cream one tablespoon of butter with one and one-half cups of sugar; add the beaten yolks of two eggs, and one cup of milk. Put enough graham crackers through the food chopper to make one and one-half cups of fine crumbs. Add this to the mixture, together with one and one-half cups of flour into which has been sifted three teaspoons of baking powder. Lastly, fold in the beaten whites of two eggs. Beat the batter well, and bake in two square baking tins, as this amount makes two thick layers. Since the cake itself is not rich, the following filling will combine with it to make a most delightful cake. Beat half a cup of butter to a cream; beat in two cups of powdered sugar; add three or four tablespoons of milk or cream, flavor to taste, and spread between and on top of the layers.

A Simple White Cake that admits of countless variations in the way of flavorings and fillings is made as follows: cream together one cup of granulated sugar and one tablespoon of butter; stir in the beaten yolk of one egg; add one cup of sour milk in which one-quarter of a teaspoon of saleratus has been dissolved. Sift together one and one-half cups of flour and one heaping teaspoon of baking powder, and add to the mixture. Lastly, fold in the beaten whites of the egg, and flavor to taste. Bake in two layers. This is a deliciously dairy cake, and may be put together with any filling.

A simple but delightful Chocolate Cake that may be baked either in two or three layers, is made by creaming together one-half cup of butter and one and one-half cups of sugar; stir in the well beaten yolks of four eggs. Dissolve two ounces of grated bitter chocolate by pouring five tablespoons of boiling water over it, and add this to the mixture. Add one-half a cup of milk, and one and three-fourths cups of flour into which has been sifted one heaping teaspoon of baking powder. Then fold in the stiffly beaten whites of four eggs, and flavor to taste. Bake in a loaf or two layers.

The Cake Fillings that require no boiling appeal to the busy housewife, especially at this time of the year, and they may be varied to just as great an extent as the boiled frostings. The very earliest one is made by adding enough powdered sugar to half a cup of cream to make it of the proper consistency. This may be diversified by the addition of different flavorings or fruit colorings, nut meats, raisins, chopped figs, dates, or candied cherries, or one ounce of grated chocolate which has been dissolved over boiling water.

If you like cream, and three tablespoons of butter in a bowl, pour three tablespoons of boiling water over it, and stir until the butter is melted. Then add enough powdered sugar to make it of the proper consistency, varying it as above directed.

The Sponge Cake possesses almost unlimited possibilities and the ease with which it is mixed makes it a favorite with time is at a premium. Sift together one cup of flour, one cup of sugar and one and one-half teaspoons of baking powder. Fold in three eggs, well beaten. Beat thoroughly, pour into a well greased pan and bake in a slow oven. This makes a delicate and most wholesome cake. Baked in a large sheet, it makes a delicious Jelly Roll. Baked in a round pan, the center may be scooped out with a silver fork, and filled with whipped cream and nut meats, making a delectable Bird's Nest. Pudding. Baked in two layers and put together with whipped cream, it makes a dairy Chocolate Pudding. Many other changes and elaborations may be devised by an enterprising cook, and the cake, though simple in construction, may be a "linked sweetness long drawn out."

THE BARBER KNOWS
Newbro's Herpicide Hailed as the Best Remedy for Hair and Scalp—Expert and Unprejudiced Opinions.
"I have been using Newbro's Herpicide for the last four years and find it the best thing made."
Joseph H. Zetter, 1675 Richmond Terrace, West Brighton, L. I., N. Y.
"I can truthfully say that Herpicide is the best remedy for the hair I have ever used."
O. A. Rathenbuecher, Virden, Ill.
"I have used many preparations in my shop, and find Herpicide best of all for falling hair and all scalp or skin diseases."
J. A. Oliver, Leaside, Ark.
"Newbro's Herpicide has always given the best of satisfaction."
S. J. Chambers, Teekvill, Wash.
While the barber necessarily carries other hair remedies, Newbro's Herpicide is one he swears by because he knows its merits. He can conscientiously recommend it to kill the dandruff germ and stop falling hair. In making an application of Herpicide he feels and knows that the customer is receiving full value for his money and will be benefited far in excess of his expectations.
One dollar size bottles are sold and guaranteed by all druggists. Send the in postage for sample and book on the hair to The Herpicide Co., Dept. R., Detroit, Mich.
J. P. Baker, special agent.

DIET AND HEALTH HINTS

By DR. T. J. ALLEN
Food Specialist

BUTTERMILK IN INFANT FEEDING.

Cow's milk cannot be made identical with the infant's natural food, but it can be approximated to it. The chief difficulty to be overcome is to adapt the large curds that tend to remain in the stomach longer than they should, as the development of the calf's stomach requires that its food shall have a much heavier curd than that required by the infant in which intestinal digestion is more important. The use of buttermilk tab-lets obviates this difficulty, besides overcoming the other objections to the use of cow's milk. But the objection naturally arises that soured milk is not natural. The reply is that cow's milk is not natural. Certainly tests of buttermilk have proved it very satisfactory.

FRENCH WHITE TOOTH PASTE

An Antiseptic and An Acid Neutralizer

The name or Trade Mark "French White" on a toilet article is a guarantee to you that it is as near perfection as it is possible to be.

French White Tooth Paste is now considered one of the very best on the market, it having not only antiseptic and acid neutralizing properties but is also pleasant to the taste. When you once experience the pleasant feeling caused by its use, you will want no other.

SECOND PRIZE AWARD IN MENU CONTEST

Margaret Mawhinney of 338 South Bluff Street Recipe Awarded Second Place.

In the recent contest for best hot weather recipe the following was awarded second prize:

Snow Pudding.
This pudding will appeal to many; as it is not only delicious, but is also economical, and can be made without using ice. 3/4 cup of boiling water, 2 fully spoonfuls sugar, a pinch of salt, one heaping tablespoonful corn starch, mixed with a little cold water. Cook well at least five minutes. Remove from fire, and immediately add the whites of two eggs beaten stiff. Beat this mixture ten minutes. Flavor as desired. Then turn into mold, or cup, and with cold water. Set in cool place for one hour before serving.

Yellow Sauce, For the Snow Pudding.
1/2 cup boiling milk, 2 tablespoons sugar. To this add the beaten yolks of two eggs, mixed with a little cold milk. Cook this very slowly for about two minutes. Serve cold, poured over the white pudding.

HONEST MEDICINES VERSUS FAKES.

President Taft's recent message suggesting an amendment to the Pure Food and Drugs law in its relation to Prepared Medicines, does not refer to such standard medicines as Foley's Kidney and Bladder Pills, and Foley's Kidney Pills, both of which are true medicines carefully compounded of ingredients whose medicinal qualities are recognized by the medical profession itself as the best known remedial agents for the diseases they are intended to counteract. For over three decades Foley's Kidney and Bladder Pills have been a standard remedy for coughs, colds and affections of the throat, chest and lungs for children and for grown persons, and it retains today its pre-eminence above all other preparations of its kind. Foley's Kidney Pills are equally effective and meritorious.—Badger Drug Co.

BELLE FOURCHE DAM ENTIRELY COMPLETED

ONE OF GREATEST EARTH DAMS
IN WORLD ERECTED BY HAYES
BROTHERS FOR U. S.
GOVERNMENT.

WAS MONSTER PROJECT

Is One of Largest Engineering Works
For Irrigation Purposes Ever Built
—Cost Approximately, \$5,000,000.

Every detail of the great \$5,000,000 government dam at Belle Fourche, South Dakota, which was constructed by the Hayes Brothers contracting firm of this city, is now completed. The last of the material and equipment used in the work has been transported and the dam stands as one of the greatest engineering projects for irrigation purposes of the United States and of the world.

Five Years in Building.
Five years were consumed in the

mixed and made near the gravel pits, were then laid over the inside surface and the dirt was washed from the surface by means of water pumped to the top of the dam by hydraulic pumps. The blocks were transported to the dam in especially built wagons and placed in position by large cranes as seen in the accompanying pictures. For laying the blocks at the bottom of the dam two or more cranes were used to lift them down from the top of the structure.

Two Conduits Built.
At the sides of the dam huge piles were driven eighteen feet into the surface to serve as anchors and hold the dirt in place. Two great concrete conduits were built one in each side of the dam in which were gates operated from the top, to regulate the flow of the water. There were many other intricate matters of construction which confronted the engineers, and many subtle contrivances were designed to solve the problems as they arose.

An enormous amount of coal and other material was used in the work. A large force of men varying in number at different times were kept constantly at work. Shacks and tents were erected to house the men and teams. These grouped together on the prairie presented the appearance of a small town.

Most of the actual work of construction

AGED EVANSVILLE COUPLE ARE WEDDED

John C. Devereaux and Mrs. Hattie Owen, For Many Years Residents of Evansville, Surprise Friends With Wedding.

(SPECIAL TO THE GAZETTE.)

Evansville, July 22.—The marriage of John C. Devereaux and Mrs. Hattie Owen was celebrated at eight o'clock Thursday evening at the home of the groom on Main street. The service was a quiet affair and only a few close relatives witnessed the ceremony which was performed by Rev. J. L. Thayer. The groom is past 75 years of age and the bride is but a few years younger. Both have resided in or near Evansville for many years and their wedding was an event of interest to a large circle of friends.

Mr. Devereaux has lived in Wisconsin upwards of 50 years and most of that time he has passed on his place four miles northwest of town and known as the Barry Oak farm. Mr. Devereaux made the trip to Janesville Thursday afternoon to secure a license and special permit and had planned to surprise his friends, but

NOTES FOR CITY FARMERS ONLY.

By H. L. RANN.

Blond will tell. There is less ivory in the head of a porcupine quill than in that of any other animal on the farm.

The colts which have graduated with the degree of A. B. can round up a herd of twenty or thirty milch cows from the back forty without needing a fellow, where a young householder mongrel is never satisfied until he has sunk his front teeth into every hoifer in the herd and has run the cattle through three or four barbed wire fences en route. Whenever you see a mealy cow with her hind legs notched into the gearing of a traction engine, make up your mind that she has been championed to the milk shed by some addled-headed pup whose pedigree is as great a mystery as the cause of gumbo.

Man is a queer bird. Ask him to squeeze a 13½ collar on a 16½ shirt and he will roar until the cash register rattles, but he will crowd a collar four sizes too small on the neck of a horse and ask him to jerk a disc harrow over the dumpling tea until his mind is as short as the pastor's salary. Nothing will disturb the sangfroid of a work horse quicker than a tight-fitting collar. We knew a farmer who rigged up a nervous gelding with a collar which had a clutch like a can opener, and a few minutes later his agitated family had to send him out of the out bin. In buying a collar for a horse, never take a model's word for it. Always ask for a fitting.

A farm paper tells its readers to saw off the handle of an old broom and give the horses a dry shampoo once a week. This is poor advice. A neighbor of ours tried this one day on a proud-applauded brood mare, and when he rummaged the broom into the animal's right ear she retaliated by kicking a few air holes in a new hatched yod in which he had invested \$2.75. The farms of this fair land of ours are loaded up with work horses which have had both eyeballs punctured as a result of this cruel practice. Go over your horses with camphor cream and a powder rag.

FORMER RICHMOND WOMAN DIED, THE RESULT OF BURNS

Mrs. August Reinke of Whitewater Died, Result of Burns Received When Clothing Took Fire From Lamp.

(SPECIAL TO THE GAZETTE.)

Richmond, July 22.—Mrs. August Reinke of Whitewater, who resided here for many years, passed away on Tuesday. Monday evening she was carrying a lighted lamp, and in some way her clothing caught fire from it, and she died from the result of the burns received. A husband and three children survive. The funeral was held from the German Lutheran church on Thursday afternoon, and the burial was in the village cemetery.

The Anderson children, from Turtle Lake, are visiting the home of Wiley Noe.

Miss Millie Holbrook, in company with a party of friends, spent Sunday at Lake Koshkonong. A package belonging to George Barber of Milwaukee is a guest at the home of his uncle, Albert Whit.

Mr. and Mrs. Ed. Ellsworth of Elkhorn, Mrs. George Keith and daughter, Aurorine; Mr. and Mrs. R. J. Harris and family, and Mrs. T. Cavaney composed two automobile parties who visited friends at Fortville, Sunday.

Mrs. A. L. Tyler and Mrs. Ada Whitmarsh of Darlen spent Sunday with local relatives.

Miss Rose Schoellkopf of Lima visited her sister the first of the week.

The Misses Mabelle and Myrtle Stiles of Whitewater spent Monday with friends.

Nels Anderson of Johnston Center is painting John Pohl's new residence.

ORFORDVILLE.

Orfordville, July 22.—Dr. W. H. McGuire of Janesville has rented rooms in the Osgood & Peterson building and expects to take possession about August 1. Dr. McGuire comes well recommended by his Janesville friends.

Mr. Melans of Stoughton was a business caller in the village on Wednesday of this week.

Misses May Devins and Estella Kinn of Fortville visited in the village, Thursday afternoon.

Miss Pearl Gaudier spent Friday afternoon in Janesville.

E. A. Homer spent Tuesday and Wednesday in Janesville.

Miss Blanche Townsend of Magnolia visited at the home of A. Wiggins, Friday.

Miss Emma and Della Sater are spending the week with their sister, Mrs. H. C. Schenck, at Madison.

Mr. and Mrs. H. E. Silvertown and daughter returned home Thursday evening, having spent the past two weeks visiting relatives in Iowa and Minnesota. They made the trip in their auto and report an excellent journey.

The many friends and neighbors will give a farewell reception to Mr. and Mrs. J. W. Keithley and family at Week's opera house, Tuesday evening, July 25, to which all are most cordially invited. The doctor and family expect to move to Beloit about Aug. 1.

Mr. and Mrs. O. A. Peterson and daughters, Neva and Signa, returned from their visit in Iowa and Minnesota, Friday morning.

The large West Indian firefly throws a light strong enough to enable a person to read newspaper print three inches away. The glow is without heat, and as yet the secret of the firefly is unexplained by science.

He Knows What Work Is.
"You lazy, good-for-nothing thing," said the citizen to the tramp. "Why don't you go to work?" "Work," said the tramp. "Do you imagine that walking from New Orleans to New York twice a year is pleasure?"

WELL-KNOWN LAWYER CURED OF ECZEMA

By Cuticura Remedies Which He Recommends for Skin Troubles.

"While attending school at Lebanon, Ohio, in 1882, there was a small-pox scare, and we were all vaccinated. Presumably from impure virus used, I became afflicted with boils, which lasted for about two years, when the affliction assumed the form of an eczema on my face, the lower part of my face being inflamed most of the time. There would be water-blisters the top, and open, and wherever the water would touch it would burn, and cause another one to rise. After the blister would open, the place would scab over, and would burn and itch so as to be almost unbearable at times. In this way the sores would spread from one place to another, back and forth over the whole of my upper lip and chin, and at times the whole lower part of my face would be a solid sore. This condition continued for four or five years, without getting any better, and in fact got worse all the time, so much so that my wife became alarmed lest it proved fatal."

"During all this time of boils and eczema, I consulted with the best physicians of this part of the country, but to no avail. Finally I decided to try Cuticura Remedies, which I did, taking the Cuticura Resolvent internally, applying the Cuticura Ointment to the sores, and using the Cuticura Soap for washing. In a very short time I began to notice improvements, and continued to use the Cuticura Remedies until within less than a year I was well again, and have not had a recurrence of the trouble since, which is over twenty years. I have recommended Cuticura Remedies to others ever since, and have great faith in them as remedies for skin diseases."

(Signed) A. C. Brandon, Attorney-at-Law, Greenville, O., Jan. 17, 1911.

Sold throughout the world. Send to Potter D. & Co., Dept. 34, Boston, for free sample of Cuticura Soap and Ointment.

VETERAN TURFMAN RETURNS TO STONEMASON TRADE AT AGE OF 60.

At Right Ed. Corrigan, who was one of the best known American turfmen only a few years since. He lost his fortune on account of the New York Anti-Gambling laws and now at the age of 60 is going back into the stonemason business at Kansas City, where he got his first start. At left, John Mackey veteran manager of James B. Higgins' horses.

Newark, July 22.—Cyril Bryce returned to Beloit, Tuesday, after spending several weeks with his grandmother, Mrs. Harriet Cadman.

Johnny Logan of Pelican Rapids, Minn., is the guest of K. H. Logan and family.

Mr. and Mrs. O. G. Cox and son, Victor, spent Sunday with Mr. and Mrs. Charles Day and family.

H. Atwood returned to Chicago, Saturday, after spending two weeks at the home of his aunt, Mrs. Ella Mead.

Mrs. C. H. Olsen and daughters, Bonita and Mildred, are the guests of friends in this vicinity.

T. A. Carroll's condition at present is critical.

In Days of Old.
A little watch made in the time of Marie Antoinette bore the inscription: "Love your country and obey the laws." One cannot help wondering what became of the lady who owned this little watch, and how she was able to decide which was the "law."

Foley's Kidney Pills are specially useful in all ailments and disorders of the kidneys and bladder, because they are composed of ingredients specially selected for their corrective, purifying, tonic, and stimulating effect upon these organs and the urinary passages. They are antiseptic, antilithic and a uric acid solvent. Try them.—Badger Drug Co.

Japanese Vegetable Oils.
The vegetable oils made and well-known in Japan are sesame, Torreyia nutifera, beech, peanut, mustard, rapeseed, perilla, Blaeococoon cordata, Op-halotaxus drupaceae, camellia, tea seed, hempseed, spurgeflower, sunflower and oil of wild Paulownia Imperialis. Inquiries were made of numerous dealers in these oils concerning a chrysanthemum oil, but none seemed to know of it.

Firefly a Mystery.
The large West Indian firefly throws a light strong enough to enable a person to read newspaper print three inches away. The glow is without heat, and as yet the secret of the firefly is unexplained by science.

SCENES AT BELLE FOURCHE DAM, SOUTH DAKOTA, SHOWING TOP OF DAM AND WATER SIDE WHERE CEMENT BLOCKS WERE LAID.

building of the monster affair which is the largest earth dam in the world. There were numerous delays in the work, however, and the local firm did not have charge of the project for the entire time. The greater part of the plans and the work was accomplished after they assumed control and its success is due to their untiring energy.

The structure is placed across Owl Creek in the extreme western part of the state of South Dakota. Behind this great obstruction which is 115 feet high in the deepest part, with a width of 600 feet at the base and graduated to 18 feet at the top, is a lake of water seven miles across which serves as a reservoir for the irrigation of 150,000 acres of land.

Problems of Construction.
There were numerous problems which confronted the engineers and the contractors in the erection of the dam. One of the most difficult matters was that of clearing all the loose dirt from the channel of the creek and from the sides of the banks on either side, in order to get down to a bed rock base. The water of the creek was obstructed and forced into another channel while these operations were going on. The problem of transporting gravel from pits some miles distant from the structure was also important. Before the Hayes Brothers took the work another firm had trouble in carrying the gravel in trains drawn by traction engines on account of the gumbo which stopped work during wet weather. Hayes Brothers at an enormous expense built a railroad connecting the two places and greatly minimized the cost of transporting the gravel which was used in making cement and in filling in the dam.

Cement Blocks Used.
When the great earth work was finally raised, there remained the final labor of putting in the cement blocks over the entire water surface of the structure. Nine inches of the inside surface of dirt was scraped off and on this was placed one foot of unscreened gravel and one foot of screened gravel. The cement blocks, 24x36x48 feet,

STOLEN ARTICLES RETURNED TO OWNER

Valuable Jewels Taken From E. P. Coon Residence in Milton Junction, July 8, Were Mysteriously Returned.

(SPECIAL TO THE GAZETTE.)

Milton, Junction, July 22.—Articles stolen from the residence of E. P. Coon here on Saturday, July 8th, were returned in a mysterious fashion last Sunday. A package discovered Sunday morning on the mail box proved to contain the missing jewels which were of much value.

The package contained Mrs. Coon's diamond ring, a ring set with opals and another with rubies and pearls, her gold watch and three valuable pins, two fountain pens, a silver watch which formerly belonged to Mr. Coon's grandfather and which was prized as an heirloom, and a pair of kid gloves. There was also a pocketbook which had contained a few dollars, but on its return contained only thirty-seven cents. There was also the key to the front door which had been taken.

There was a long gold watch chain which was not returned with the other articles, but which was deposited in a similar way a few days later. The bank notes and certificates of deposit which were for large amounts, but not negotiable, were not returned.

It is thought that the work was done by amateurs who either became frightened after committing the deed or had been found out by their parents or others who persuaded them to return their booty.

When the great earth work was finally raised, there remained the final labor of putting in the cement blocks over the entire water surface of the structure. Nine inches of the inside surface of dirt was scraped off and on this was placed one foot of unscreened gravel and one foot of screened gravel. The cement blocks, 24x36x48 feet,

tion was completed last fall and only the clearing of the debris and placing the structure in situ have remained to be done this summer. The last of the houses and miles and the equipment was shipped east last week.

Following the ceremony the young people of their acquaintance gave the couple a serenade and while the musical instruments consisted chiefly of tin horns and brass bells, the aged groom seemed to enjoy the fun for he not only passed the cigars but ordered ice cream for the crowd.

Mrs. David M. Johnson.
The funeral of Mrs. David M. Johnson was held yesterday afternoon from the home on Garfield Ave. and was largely attended. Rev. P. A. Gilmore of Madison conducted the service. The out of town relatives who were here for the funeral were: Mrs. C. H. Woodbury, and Mr. and Mrs. John C. Nichols of Janesville; Miss Helen Brooks, Chicago; Frank Brooks, Yeladburg, Mich.; S. Y. Brooks, Milwaukee; Mr. and Mrs. Charles Brooks and P. Pierce and family, of Stoughton; L. E. Johnson and Miss Pearl Johnson of Cookville; and Mrs. Myrtle Roberts of Union Grove.

the train on which he returned also brought The Janesville Gazette which told of his visit to the county clerk and before he reached home his neighbors were congratulating him.

Following the ceremony the young people of their acquaintance gave the couple a serenade and while the musical instruments consisted chiefly of tin horns and brass bells, the aged groom seemed to enjoy the fun for he not only passed the cigars but ordered ice cream for the crowd.

Mrs. David M. Johnson.
The funeral of Mrs. David M. Johnson was held yesterday afternoon from the home on Garfield Ave. and was largely attended. Rev. P. A. Gilmore of Madison conducted the service. The out of town relatives who were here for the funeral were: Mrs. C. H. Woodbury, and Mr. and Mrs. John C. Nichols of Janesville; Miss Helen Brooks, Chicago; Frank Brooks, Yeladburg, Mich.; S. Y. Brooks, Milwaukee; Mr. and Mrs. Charles Brooks and P. Pierce and family, of Stoughton; L. E. Johnson and Miss Pearl Johnson of Cookville; and Mrs. Myrtle Roberts of Union Grove.

Mrs. Mary Haywood entertained yesterday afternoon at a party which was given as a farewell for Miss Catherine Love who will return to her home in Milwaukee the first of the week.

Mrs. I. P. De Gettle has leased her house on Main street to Martin Hanson who will move into it about Sept. 15.

Mrs. Fred Winston spent Thursday in Janesville.

The Electric Iron Means Less Work

Every woman who has tried one knows that the week's ironing can be finished in one-third less time with an ELECTRIC IRON than with any of the old fashioned sad-irons. Electric Irons abolish the many weary steps, hard work and petty inconveniences that make sad-iron ironing a drudgery.

The smooth, glossy finish of the clothes is convincing evidence of the superior quality of workmanship, possible only with ELECTRIC IRONS.

Price, \$3.50 up.
